Form 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2007,

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 001-32601

LIVE NATION, INC.

(Exact name of registrant as specified in its charter)

Delaware
(State of Incorporation)

20-3247759
(I.R.S. Employer Identification No.)

9348 Civic Center Drive
Beverly Hills, CA 90210
(Address of principal executive offices, including zip code)

(310) 867-7000
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer.

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

On November 2, 2007, there were 73,346,969 outstanding shares of the registrant's common stock, \$0.01 par value per share.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 — SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Business

Live Nation, Inc. (the “Company” or “Live Nation”) was incorporated in Delaware on August 2, 2005 in preparation for the contribution and transfer by Clear Channel Communications, Inc. (“Clear Channel”) of substantially all of its entertainment assets and liabilities to the Company (the “Separation”). The Company completed the Separation on December 21, 2005 and became a publicly traded company on the New York Stock Exchange trading under the symbol “LYV”.

Prior to the Separation, Live Nation was a wholly owned subsidiary of Clear Channel. As part of the Separation, holders of Clear Channel’s common stock received one share of Live Nation common stock for every eight shares of Clear Channel common stock.

Beginning in 2007, the Company reorganized its business units and the way in which these businesses are assessed and therefore changed its reportable segments to North American Music, International Music, Global Artists, Global Digital and Global Theater. The North American Music segment principally involves the promotion of live music events in the Company’s owned and/or operated venues and in rented third-party venues and the operation and management of music venues principally in the United States and Canada. The International Music segment principally involves the promotion of live music events in the Company’s owned and/or operated venues and in rented third-party venues, the production of music festivals and the operation and management of music venues outside of North America. The Global Artists segment principally involves the promotion and/or production of global music tours as well as providing various services to artists including recorded music and music publishing, merchandise, artist fan sites and ticketing, broadcast/digital media rights, and sponsorship and marketing services. The Global Digital segment principally involves the management of the Company’s in-house centralized ticketing operations and online and wireless distribution activities, including the development of the Company’s website. The Global Theater segment principally involves the presentation and production of touring and other theatrical performances and the operation and management of theatrical venues. In addition, the Company has operations in the specialized motor sports, sports representation and other businesses, which are included under “other”.

Seasonality

Due to the seasonal nature of shows in outdoor amphitheaters and festivals, which primarily occur May through September, the Company experiences higher revenues during the second and third quarters. This seasonality also results in higher balances in cash and cash equivalents, accounts receivable, prepaid expenses, accrued expenses and deferred revenue at different times in the year.

Preparation of Interim Financial Statements

The consolidated financial statements included in this report have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”) and, in the opinion of management, include all adjustments (consisting of normal recurring accruals and adjustments necessary for adoption of new accounting standards) necessary to present fairly the results of the interim periods shown. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles in the United States have been condensed or omitted pursuant to such SEC rules and regulations. Management believes that the disclosures made are adequate to make the information presented not misleading. Due to seasonality and other factors, the results for the interim periods are not necessarily indicative of results for the full year. The financial statements contained herein should be read in conjunction with the consolidated and combined financial statements and notes thereto included in the Company’s 2006 Annual Report on Form 10-K.

The consolidated financial statements include all accounts of the Company, its majority owned subsidiaries and variable interest entities for which the Company is the primary beneficiary. Significant intercompany accounts among the consolidated businesses have been eliminated in consolidation. Minority interest expense (income) is recorded for consolidated affiliates in which the Company owns more than 50%, but not all, of the voting common stock and also variable interest entities for which the Company is the primary beneficiary. Investments in nonconsolidated affiliates in which the Company owns 20% to 50% of the voting common stock or otherwise exercises significant influence over operating and financial policies of the nonconsolidated affiliate are accounted for using the equity method of accounting. Investments in nonconsolidated affiliates in which the Company owns less than 20% of the voting common stock are accounted for using the cost method of accounting.

Index to Financial Statements

Reclassifications

Certain reclassifications have been made to the 2006 consolidated financial statements to conform to the 2007 presentation. The Company made a correction in the accounting for a non-music touring production acquired with Concert Productions International (“CPI”) which was previously accounted for under the equity method of accounting. For the nine and three months ended September 30, 2006, this correction resulted in increases in revenue, direct operating expenses and selling, general and administrative expenses of \$13.4 million, \$12.8 million and \$0.1 million, respectively, and a decrease in equity in earnings of nonconsolidated affiliates of \$0.5 million. In addition, as of December 31, 2006, \$2.1 million was reclassified from investments in nonconsolidated affiliates to accounts receivable. Finally, these reclassifications resulted in a \$2.4 million reduction in cash flows provided by operating activities and cash flows used in investing activities for the nine months ended September 30, 2006. None of these reclassifications are considered significant to the Company’s results of operations or financial position.

New Accounting Pronouncements

In June 2006, the Financial Accounting Standards Board (“FASB”) issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes — an interpretation of FASB Statement No. 109* (“FIN 48”). FIN 48 creates a single model to address uncertainty in tax positions. FIN 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006. The Company adopted FIN 48 on January 1, 2007, as required. See Note 8 for further discussion of the effect that adoption of FIN 48 had on the Company’s financial position and results of operations.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (“Statement 157”). Statement 157 provides guidance for using fair value to measure assets and liabilities and also responds to investors’ requests for expanded information about the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value, and the effect of fair value measurements on earnings. Statement 157 applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. Statement 157 does not expand the use of fair value in any new circumstances. Statement 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The provisions of Statement 157 are applied prospectively with retrospective application to certain financial instruments. The Company will adopt Statement 157 on January 1, 2008 and is currently assessing the impact its adoption will have on its financial position and results of operations.

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (“Statement 159”). Statement 159 allows entities to voluntarily choose, at specified election dates, to measure many financial assets and financial liabilities (as well as certain nonfinancial instruments that are similar to financial instruments) at fair value (the “fair value option”). The election is made on an instrument-by-instrument basis and is irrevocable. If the fair value option is elected for an instrument, Statement 159 specifies that all subsequent changes in fair value for that instrument will be reported in earnings. Statement 159 is effective as of the beginning of an entity’s first fiscal year that begins after November 15, 2007. Upon initial adoption, Statement 159 provides entities with a one-time chance to elect the fair value option for existing eligible items. The effect of the first measurement to fair value should be reported as a cumulative-effect adjustment to the opening balance of retained earnings in the year of adoption. The Company will adopt Statement 159 on January 1, 2008 and is currently assessing the impact its adoption will have on its financial position and results of operations.

In August 2007, the FASB issued for comment an exposure draft of a proposed FASB Staff Position APB 14-a (“Proposed FSP”) that would change the accounting for certain convertible debt instruments, including the Company’s 2.875% convertible senior notes. Under the proposed new rules, for convertible debt instruments that may be settled entirely or partially in cash upon conversion, an entity should separately account for the liability and equity components of the instrument in a manner that reflects the issuer’s economic interest cost. The effect of the proposed new rules for the Company’s 2.875% convertible senior notes is that the equity component would be included in the additional paid-in capital section of shareholders’ equity on the Company’s balance sheet and the value of the equity component would be treated as an original issue discount for purposes of accounting for the debt component of the 2.875% convertible senior notes. Higher interest expense would result by recognizing the accretion of the discounted carrying value of the 2.875% convertible senior notes to their face amount as interest expense over the expected term of the 2.875% convertible senior notes using an effective interest rate method of amortization. This Proposed FSP, if issued in its current state, would be effective for fiscal years beginning after December 15, 2007, would not permit early application and would be applied retrospectively to all periods presented. The Company is currently evaluating the proposed new rules and its impact on the Company’s current accounting for the 2.875% convertible senior notes. However, if the Proposed FSP is adopted in its current form, the

[Index to Financial Statements](#)

Company expects to recognize additional interest expense starting in 2008 due to the interest expense accretion associated with the 2.875% convertible senior notes and to report greater than previously reported interest expense due to retrospective application.

NOTE 2 — LONG-LIVED ASSETS

Definite-lived Intangibles

The Company has definite-lived intangible assets which are amortized over the shorter of either the respective lives of the agreements or the period of time the assets are expected to contribute to the Company's future cash flows. The following table presents the gross carrying amount and accumulated amortization of definite-lived intangible assets as of September 30, 2007 and December 31, 2006:

	September 30, 2007		December 31, 2006	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
	(in thousands)			
Venue management and leasehold interests	\$ 69,339	\$ (6,710)	\$ 7,456	\$ (1,937)
Artist relationships	175,366	(13,250)	42,181	(5,123)
Revenue-generating contracts	46,649	(8,618)	21,035	(2,777)
Trademarks and naming rights	12,560	(2,699)	9,020	(2,196)
Non-compete agreements	912	(487)	1,804	(1,432)
Other	4,469	(805)	4,360	(584)
Total	\$ 309,295	\$ (32,569)	\$ 85,856	\$ (14,049)

During the nine months ended September 30, 2007, the Company recorded additional definite-lived intangible assets totaling \$221.1 million, which represents the majority of the increase above, due to purchase accounting adjustments for venue management and leasehold interests, revenue-generating contracts and artist relationships primarily resulting from the Company's 2006 acquisition of HOB Entertainment, Inc. ("HOB") and the Company's 2007 acquisition of the remaining interest in Concert Productions International ("CPI"). These additional definite-lived intangible assets have a weighted average life of approximately ten years.

Total amortization expense from definite-lived intangible assets for the three months ended September 30, 2007 and 2006 and the nine months ended September 30, 2007 and 2006 was \$6.8 million, \$3.8 million, \$20.4 million and \$4.7 million, respectively. The increase for the three months and nine months ended September 30, 2007 as compared to the same periods of the prior year was primarily due to amortization of intangible assets recorded as part of the purchase price allocations of the Company's acquisitions of HOB and CPI.

Indefinite-lived Intangibles

The Company has indefinite-lived intangible assets which consist primarily of the intangible value related to trade names which are reviewed for impairment at least annually. These indefinite-lived intangible assets had a carrying value of \$26.0 million and \$1.6 million as of September 30, 2007 and December 31, 2006, respectively. The increase in indefinite-lived intangible assets during 2007 was due primarily to the intangible value related to trade names resulting from purchase accounting adjustments for the Company's 2006 acquisition of HOB and the Company's 2007 acquisition of the remaining interest of Musictoday, LLC ("Musictoday").

Goodwill

The Company tests goodwill for impairment at least annually using a two-step process. The first step, used to screen for potential impairment, compares the fair value of the reporting unit with its carrying amount, including goodwill. The second step, used to measure the amount of any potential impairment, compares the implied fair value of the reporting unit with the carrying amount of goodwill. As the Company has realigned its segments, beginning in 2007, in accordance with the change in the management of the business units, goodwill has been reallocated to the new reporting business units that make up these segments utilizing a fair value approach. For each reportable operating segment, the reporting units were determined to be either the operating segment or the components thereof in accordance with FASB Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets*. The following table presents the changes in the carrying amount of goodwill in each of the Company's business segments for the nine-month period ended September 30, 2007:

	North American Music	International Music	Global Artists	Global Digital	Global Theater	Total
	(in thousands)					
Balance as of December 31, 2006	\$291,053	\$ 113,570	\$13,211	\$ —	\$5,335	\$423,169
Acquisitions	(62,245)	65,836	15,425	—	164	19,180
Foreign currency	3,846	3,898	884	—	1,403	10,031
Adjustments	(1,559)	(9,572)	(362)	—	(569)	(12,062)
Balance as of September 30, 2007	\$231,095	\$ 173,732	\$29,158	\$ —	\$6,333	\$440,318

[Index to Financial Statements](#)

Included in the acquisition amounts above are \$3.1 million, \$44.1 million, \$60.0 million and \$15.7 million of goodwill related to the Company's acquisitions of Jackie Lombard Productions ("Jackie Lombard") in the first quarter of 2007, the remaining 50% interest in House of Blues Concerts Canada ("HOB Canada") in the second quarter of 2007, a 55.9% interest in Academy Music Holdings Limited ("AMG") and the remaining interest in Musictoday, both in the third quarter of 2007, respectively. The Company began consolidating AMG in July 2007 after the completion of a two-step acquisition of interests in AMG through its joint venture with Gaiety Investments ("Gaiety"). The Company owns 50.1% of the joint venture with Gaiety. The goodwill recorded related to AMG represents the value of accelerating the Company's venue strategy in the United Kingdom through AMG's interest in twelve music venues through a well-recognized brand.

In addition, also included in the acquisition amount above, is a reduction of goodwill recorded during 2007 related to adjustments in the purchase accounting for the Company's acquisition of HOB in November 2006. This HOB adjustment included a reduction in goodwill of \$105.3 million related to the recording of the fair value of definite-lived and indefinite-lived intangibles related to venue management and leasehold interests, revenue-generating contracts and trade names, and a \$6.0 million reduction related to the fair value adjustment of fixed assets. These decreases were partially offset by an increase in goodwill of \$4.4 million related to pre-acquisition liabilities for HOB. The Company is in the process of finalizing its purchase accounting for recent acquisitions which could result in a change to the allocation of the purchase price.

In addition, during 2007, the Company recorded adjustments of \$12.1 million primarily related to deferred tax assets, with an offset to goodwill, due to the limited availability of future tax deductions as a result of the settlement of certain Internal Revenue Service audits of the Company for periods prior to Clear Channel's acquisition in 2000 and the allocation of goodwill and reversal of restructuring accruals related to the sale of seven small-sized music venues in London.

Property, Plant and Equipment

The Company tests for possible impairment of property, plant and equipment whenever events or circumstances change, such as a significant reduction in operating cash flow or a dramatic change in the manner that the asset is intended to be used indicate that the carrying amount of the asset may not be recoverable. If indicators exist, the Company compares the estimated undiscounted future cash flows related to the asset to the carrying value of the asset. If the carrying value is greater than the estimated undiscounted future cash flows amount, an impairment charge is recorded based on the difference between the discounted future cash flow estimates and the carrying value. Any such impairment charge is recorded in depreciation and amortization expense in the statement of operations for amounts necessary to reduce the carrying value of the asset to fair value.

During the third quarter of 2006, the Company reviewed the carrying value of certain property, plant and equipment assets that management determined would, more likely than not, be disposed of before the end of their previously estimated useful lives or had an indicator that future operating cash flows may not support their carrying value. It was determined that several of those assets were impaired since the estimated undiscounted cash flows associated with those assets were less than their carrying value. These cash flows were calculated using estimated sale values of the land for the assets being evaluated for disposal, that were developed based on an approximate value related to the best use of the land or appraised values, in addition to operating cash flows, all of which were used to approximate fair value. As a result, the Company recorded impairment charges of \$37.9 million and \$4.2 million as a component of depreciation and amortization expense in its North American Music and Global Theater segments, respectively, primarily related to several amphitheatres to be disposed of or determined to be impaired and a theater development project.

NOTE 3 — RESTRUCTURING

As part of the Company's acquisition of HOB Canada in June 2007, the Company accrued \$1.2 million in restructuring costs in its North American Music segment related to severance costs which it expects to pay in 2007. These additional costs

Index to Financial Statements

were recorded as an adjustment to the purchase price. As of September 30, 2007, the accrual balance for the HOB Canada restructuring was \$0.6 million. This restructuring resulted in the termination of eight employees.

As part of the Company's acquisition of HOB in November 2006, the Company accrued \$5.5 million in restructuring costs in its North American Music segment related to severance costs which it expects to pay in 2007. These additional costs were recorded as an adjustment to the purchase price. As of September 30, 2007, the accrual balance for the HOB restructuring was \$0.2 million. This restructuring will result in the termination of 80 employees, the majority of which have been terminated as of September 30, 2007.

As part of the Company's acquisition of Mean Fiddler Music Group, PLC, subsequently renamed Festival Republic ("Mean Fiddler"), in July 2005, the Company accrued \$4.7 million during the year ended 2005 and recorded an additional accrual of \$2.7 million in 2006 in its International Music segment primarily related to lease terminations which it expects to pay over the next several years. These additional costs were recorded as adjustments to the purchase price. In August 2007, the Company sold seven small-sized music venues that were acquired with Mean Fiddler resulting in an adjustment of \$4.4 million to the restructuring accrual with an offset to goodwill for the lease terminations related to these venues. As of September 30, 2007, the accrual balance for the Mean Fiddler restructuring was \$1.1 million.

In addition, the Company has a remaining restructuring accrual of \$1.9 million as of September 30, 2007, related to its merger with Clear Channel in August 2000.

In total, the Company has recorded a liability in purchase accounting related to severance for terminated employees and lease terminations as follows:

	Nine Months Ended September 30,	
	2007	2006
	(in thousands)	
Severance and lease termination costs:		
Accrual at January 1	\$13,132	\$6,223
Restructuring accrual recorded	1,456	2,735
Payments charged against restructuring accrual	(6,185)	(772)
Adjustments to restructuring accrual	(4,434)	—
Remaining accrual at September 30	<u>\$ 3,969</u>	<u>\$8,186</u>

The remaining severance and lease accrual is comprised of \$1.5 million of severance and \$2.5 million of lease termination costs. The severance accrual includes amounts that will be paid over the next several years related to deferred payments to former employees, as well as other compensation. The lease termination accrual will be paid over the next 16 years. During the three and nine months ended September 30, 2007, \$0.9 million and \$5.8 million, respectively, was charged to the restructuring reserve related to severance. The Company is continuing to evaluate its purchase accounting liabilities related to its recent acquisitions which may result in additional restructuring accruals.

NOTE 4 — LONG-TERM DEBT

Long-term debt, which includes capital leases, at September 30, 2007 and December 31, 2006, consisted of the following:

	September 30,	December 31,
	2007	2006
	(in thousands)	
Senior Secured Credit Facility:		
Term loan	\$ 452,865	\$ 546,750
Revolving credit facility	—	48,000
2.875% convertible senior notes due 2027	220,000	—
Other long-term debt	100,575	44,396
	773,440	639,146
Less: current portion	48,465	31,721
Total long-term debt	<u>\$ 724,975</u>	<u>\$ 607,425</u>

Senior Secured Credit Facility

In December 2005, the Company entered into a senior secured credit facility consisting of a term loan in the original amount of \$325 million and a \$285 million revolving credit facility. The interest rate is based upon a prime rate or LIBOR, selected at the Company's discretion, plus an applicable margin. The senior secured credit facility is secured by a first

Index to Financial Statements

priority lien on substantially all of its domestic assets (other than real property and deposits maintained by the Company in connection with promoting or producing live entertainment events) and a pledge of the capital stock of the Company's material domestic subsidiaries.

In connection with the HOB acquisition in November 2006, the Company entered into an Incremental Assumption Agreement and Amendment No. 1 ("Credit Facility Amendment No. 1") to its senior secured credit facility. The Credit Facility Amendment No. 1 increased the amount available under the senior secured credit facility by providing for a new \$200 million term loan which matures in December 2013.

In December 2006, the Company entered into Amendment No. 2 to its senior secured credit facility. This amendment provides that all term loans under the credit facility bear interest at per annum floating rates equal, at the Company's option, to either (a) the base rate (which is the greater of the prime rate offered by JPMorgan Chase Bank, N.A. or the federal funds rate plus .5%) plus 1.75% or (b) Adjusted LIBOR plus 2.75%.

In December 2006, the Company entered into an Incremental Assumption Agreement and Amendment No. 3 ("Credit Facility Amendment No. 3") to its senior secured credit facility. The Credit Facility Amendment No. 3 increased the amount available under the senior secured credit facility by providing for a new \$25 million term loan which matures in December 2013.

In June 2007, the Company entered into an Amended and Restated Credit Agreement (the "Amended Credit Agreement") which amends and restates the Company's existing senior secured credit agreement to modify certain covenants and other provisions and facilitate potential future acquisitions. The Amended Credit Agreement consists of a \$550 million term loan facility and a \$285 million revolving credit facility, with the right, subject to certain conditions, to increase such facilities by up to \$250 million in the aggregate. The revolving credit facility provides for borrowings up to the amount of the facility with sub-limits of up to \$235 million to be available for the issuance of letters of credit and up to \$100 million to be available for borrowings in foreign currencies. Under the Amended Credit Agreement, revolving loans bear interest at an annual rate of LIBOR plus 1.75%, subject to stepdowns based on the Company's leverage ratio at the time of borrowing, and term loans bear interest at an annual rate of LIBOR plus 2.75%.

The senior secured credit facility contains a number of covenants that, among other things, restrict the Company's ability to incur additional debt, pay dividends and make distributions, make certain investments and acquisitions, repurchase stock and prepay certain indebtedness, create liens, enter into agreements with affiliates, modify the nature of the business, enter into sale-leaseback transactions, transfer and sell material assets, and merge or consolidate.

At September 30, 2007, the outstanding balance on the term loans and revolving credit facility was \$452.9 million and \$0 million, respectively. Taking into account letters of credit of \$43.9 million, \$241.1 million was available for future borrowings. The Company is required to make minimum quarterly principal repayments under the original term loan of approximately \$3.2 million per year through March 2013, with the balance due at maturity in June 2013 and minimum quarterly principal repayments under the incremental term loans of approximately \$2.3 million per year through September 2013, with the balance due at maturity in December 2013. The revolving credit portion of the credit facility matures in June 2012. At September 30, 2007, the weighted average interest rate, including the benefit of the interest rate swap agreements, on term loans under this credit facility was 7.92%.

The interest rate paid on borrowings on the Company's senior term loans is 2.75% above LIBOR. The interest rate paid on the Company's \$285 million, multi-currency revolving credit facility depends on its total leverage ratio. Based on the Company's current total leverage ratio, its interest rate on revolving credit borrowings is 1.75% above LIBOR. In addition to paying interest on outstanding principal under the credit facility, the Company is required to pay a commitment fee to the lenders under the revolving credit facility in respect of the unutilized commitments. As of September 30, 2007, the commitment fee rate was 0.375%. The Company is also required to pay customary letter of credit fees, as necessary. In the event the Company's leverage ratio improves, the interest rate on revolving credit borrowings declines gradually to .75% at a total leverage ratio of less than, or equal to, 1.25 times.

Convertible Senior Notes

In July 2007, the Company issued \$220.0 million of convertible senior notes due 2027 in a private placement in the United States to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933, as amended. The notes will pay interest semiannually at a rate of 2.875% per annum. Beginning with the period commencing on July 20, 2014 and ending on January 14, 2015, and for each of the interest periods commencing thereafter, the Company will pay contingent interest on the notes if the average trading price of the notes during the five consecutive trading days ending on the second

Index to Financial Statements

trading day immediately preceding the first day of the applicable interest period equals or exceeds 120% of the principal amount of the notes. The contingent interest payable per note will equal 0.25% per year of the average trading price of such note during the applicable five trading-day reference period, payable in arrears. The notes will be convertible, under certain circumstances, at an initial conversion rate of 36.8395 shares per \$1,000 principal amount of notes, which represents a 27.5% conversion premium based on the last reported sale price of \$21.29 per share on July 10, 2007. Upon conversion, the notes may be settled in shares of Live Nation common stock or, at the Company's election, cash or a combination of cash and shares of Live Nation common stock. The net proceeds from the offering, after deducting estimated offering expenses payable by the Company, were approximately \$212.4 million.

Holders of the convertible senior notes may require the Company to purchase for cash all or a portion of their notes on July 15, 2014, July 15, 2017 and July 15, 2022 at a price equal to 100% of the principal amount plus accrued and unpaid interest, if any, subject to specified additional conditions. In addition, if the Company experiences a fundamental change, as defined in the indenture governing the notes, holders may require the Company to purchase for cash all or a portion of their notes, subject to specified exceptions, at a price equal to 100% of the principal amount of the notes plus accrued and unpaid interest, if any.

The Company may not redeem the convertible senior notes prior to July 20, 2014. On or after July 20, 2014, the Company may redeem all or a portion of the notes for cash at a price equal to 100% of the principal amount being redeemed plus accrued and unpaid interest, if any.

See Note 5 for discussion on the accounting for derivative instruments related to the convertible senior notes.

Other Long-term Debt

Other long-term debt is comprised of capital leases of \$9.9 million and notes payable of \$90.7 million, including debt to a minority interest partner of \$24.1 million. As part of the consolidation of the acquisition of AMG in July 2007, the Company's long-term debt now includes \$57.7 million of AMG's long-term debt which consists of eight notes. Total notes payable primarily consist of eleven notes with interest rates ranging from 6.0% to 11.0% and maturities ranging up to fourteen years.

Future maturities of long-term debt at September 30, 2007 are as follows:

	<u>(in thousands)</u>
2007	\$ 39,444
2008	11,336
2009	11,215
2010	11,264
2011	15,421
Thereafter	684,760
Total	\$ 773,440

All long-term debt without a stated maturity date is considered current and is reflected as maturing in the earliest period shown in the table above.

Debt Covenants

The significant covenants on the Company's senior secured credit facility relate to total leverage, senior leverage, interest coverage, and capital expenditures contained and defined in the credit agreement. The adjusted leverage ratio covenant requires the Company to maintain a ratio of consolidated total indebtedness minus unrestricted cash and cash equivalents, up to a maximum of \$150 million (all as defined by the credit agreement) to consolidated earnings-before-interest-taxes-depreciation-and-amortization (as defined by the credit agreement, "Adjusted Consolidated EBITDA") of less than 4.5 times through June 30, 2008, and less than 4.0 times thereafter, provided that aggregated subordinated indebtedness and permitted holding company indebtedness (as defined by the credit agreement) is less than \$25 million or 6.0 times if greater than \$25 million. The senior leverage covenant, which is only applicable provided aggregate subordinated indebtedness and permitted holding company indebtedness is greater than \$25 million, requires the Company to maintain a ratio of adjusted consolidated senior indebtedness minus unrestricted cash and cash equivalents to Adjusted Consolidated EBITDA of less than 4.5 times through March 31, 2008 and 4.0 times thereafter. The interest coverage covenant requires the Company to maintain a minimum ratio of Adjusted Consolidated EBITDA to cash interest expense (as defined by the credit agreement) of 2.5 times. The capital expenditure covenant limits annual capital expenditures (as defined by the credit agreement) to \$110 million or less. In the event that the Company does not meet these covenants, the Company is considered to be in default on the senior secured credit facility at which time the credit facility may become immediately due. This senior secured credit facility contains a cross default provision that would be triggered if the Company were to default on any other indebtedness greater than \$10 million.

Index to Financial Statements

The Company's other indebtedness, excluding the convertible notes, does not contain provisions that would make it a default if the Company were to default on its credit facility.

The Company believes there are no other agreements that contain provisions that trigger an event of default upon a change in long-term debt ratings that would have a material impact on its financial statements.

At September 30, 2007, the Company was in compliance with all debt covenants. The Company expects to remain in compliance throughout 2007.

NOTE 5 — DERIVATIVE INSTRUMENTS

FASB Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities* ("Statement 133"), requires the Company to recognize all of its derivative instruments as either assets or liabilities in the consolidated balance sheets at fair value. The accounting for changes in the fair value of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship, and further, on the type of hedging relationship. For derivative instruments that are designated and qualify as hedging instruments, the Company must designate the hedging instrument, based upon the exposure being hedged, as a fair value hedge, cash flow hedge or a hedge of a net investment in a foreign operation. The Company formally documents all relationships between hedging instruments and hedged items, as well as its risk management objectives and strategies for undertaking various hedge transactions. The Company formally assesses, both at inception and at least quarterly thereafter, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in either the fair value or cash flows of the hedged item. If a derivative ceases to be a highly effective hedge, the Company discontinues hedge accounting. The Company accounts for its derivative instruments that are not designated as hedges at fair value with changes in fair value recorded in earnings. The Company does not enter into derivative instruments for speculation or trading purposes.

For derivative instruments that are designated and qualify as a cash flow hedge (i.e., hedging the exposure to variability in expected future cash flows that is attributable to a particular risk), the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income (loss) and reclassified into earnings in the same line item associated with the forecasted transaction in the same period or periods during which the hedged transaction affects earnings (for example, in interest expense when the hedged transactions are interest cash flows associated with floating-rate debt). The remaining gain or loss on the derivative instrument in excess of the cumulative change in the present value of future cash flows of the hedged item, if any, is recognized in other expense (income) — net in current earnings during the period of change.

In March 2006, the Company entered into two interest rate swap agreements, designated as cash flow hedges, which are combinations of purchased interest rate caps on a notional amount of a total of \$162.5 million and sold floors over the same period on a total of \$121.9 million of the notional amount to effectively convert a portion of its floating-rate debt to a fixed-rate basis. The principal objective of these contracts is to eliminate or reduce the variability of the cash flows in interest payments associated with the Company's floating-rate debt as required by the Company's senior secured credit facility, thus reducing the impact of interest rate changes on future interest expense. Approximately 35% of the Company's outstanding term loans under its senior secured credit facility had its interest payments designated as the hedged forecasted transactions against the interest rate swap agreements at September 30, 2007. As of September 30, 2007, the interest rate for these hedges was fixed at 5.11% on a variable rate of 5.20% based on a 3-month LIBOR; this variable rate is subject to quarterly adjustments. For the three months ended September 30, 2007 and 2006 and the nine months ended September 30, 2007 and 2006, these hedges were determined to be highly effective and the Company recorded an unrealized loss of \$1.4 million, \$2.0 million, \$1.0 million and \$0.1 million, respectively, as a component of other comprehensive income. Based on the current interest rate expectations, the Company estimates that approximately \$0.5 million of this loss in other comprehensive income will be reclassified into earnings in the next 12 months.

Index to Financial Statements

The Company has recorded a gain (loss) and related asset (liability) related to these derivative instruments during the period as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2007	2006	2007	2006
	(in thousands)			
Balance at beginning of period	\$ 539	\$ 1,869	\$ 104	\$ —
Unrealized holding gain (loss) on cash flow derivatives	(1,407)	(2,002)	(972)	(133)
Balance at end of period	<u>\$ (868)</u>	<u>\$ (133)</u>	<u>\$ (868)</u>	<u>\$ (133)</u>

As part of the acquisition of AMG, the Company now has interest rate swap agreements to convert a portion of AMG's long-term debt from floating-rate debt to a fixed-rate basis. These interest rate swap agreements have not been designated as hedging instruments. Therefore, any change in fair value is recorded in earnings during the period of the change. As of September 30, 2007, the change in fair value was not significant to the Company's results of operations.

The Company's convertible senior notes issued in July 2007 include certain provisions which are bifurcated from the notes and accounted for as derivative instruments. At the date of issuance and as of September 30, 2007, the fair value of these provisions is considered de minimis.

Occasionally, the Company will use forward currency contracts to reduce its exposure to foreign currency risk. The principal objective of such contracts is to minimize the risks and/or costs associated with artist fee commitments. At September 30, 2007, the Company had no outstanding forward currency contracts.

NOTE 6 — COMMITMENTS AND CONTINGENT LIABILITIES

The Company has leases that contain contingent payment requirements for which payments vary depending on revenues, tickets sold or other variables.

As of September 30, 2007 and December 31, 2006, the Company guaranteed the debt of third parties of approximately \$3.1 million and \$1.9 million, respectively, primarily related to maximum credit limits on employee and tour related credit cards and bank lines of credit of a nonconsolidated affiliate and a third-party promoter.

During 2006, in connection with the Company's acquisition of Historic Theatre Group, the Company guaranteed obligations related to a lease agreement. In the event of default, the Company could be liable for obligations which have future lease payments (undiscounted) of approximately \$45.3 million through the end of 2035. The scheduled future minimum rentals for this lease for the years 2007 through 2011 are \$1.6 million each year. The Company believes that the likelihood of a material liability being triggered under this lease is remote, and no liability has been accrued for these contingent lease obligations as of September 30, 2007.

In connection with the sale of a portion of its sports representation business assets during 2006, the Company guaranteed the performance of a third party related to an employment contract in the amount of approximately \$0.5 million. This guarantee is effective through December 31, 2008; however, it would only require payment by the Company in the event of the buyer's insolvency. As of September 30, 2007 and December 31, 2006, the carrying value of this liability recorded by the Company was \$0.1 million for each of the respective periods.

Certain agreements relating to acquisitions provide for purchase price adjustments and other future contingent payments based on the financial performance of the acquired companies. The Company will accrue additional amounts related to such contingent payments if and when it is determinable that the applicable financial performance targets will be met. The aggregate of these contingent payments, if performance targets are met, would not significantly impact the financial position or results of operations of the Company.

The Company was a defendant in a lawsuit filed by Malinda Heerwagen on June 13, 2002, in the U.S. District Court for the Southern District of New York. The plaintiff, on behalf of a putative class consisting of certain concert ticket purchasers, alleged that anti-competitive practices for concert promotion services by the Company nationwide caused artificially high ticket prices. On August 11, 2003, the Court ruled in the Company's favor, denying the plaintiff's class certification motion. The plaintiff appealed this decision to the U.S. Court of Appeals for the Second Circuit. On January 10, 2006, the U.S. Court of Appeals for the Second Circuit affirmed the ruling in the Company's favor by the District Court. On January 17, 2006, the plaintiff filed a Notice of Voluntary Dismissal of her action in the Southern District of New York.

The Company is a defendant in twenty-two putative class actions filed by different named plaintiffs in various U.S. District Courts throughout the country. The claims made in these actions are substantially similar to the claims made in the Heerwagen action discussed above, except that the geographic markets alleged are regional, statewide or more local in nature, and the members of the putative classes are limited to individuals who purchased tickets to concerts in the relevant

[Index to Financial Statements](#)

geographic markets alleged. The plaintiffs seek unspecified compensatory, punitive and treble damages, declaratory and injunctive relief and costs of suit, including attorneys' fees. The Company has filed its answers in some of these actions, and has denied liability. On December 5, 2005, the Company filed a motion before the Judicial Panel on Multidistrict Litigation to transfer these actions and any similar ones commenced in the future to a single federal district court for coordinated pre-trial proceedings. On April 17, 2006, the Panel granted the Company's motion and ordered the consolidation and transfer of the actions to the U.S. District Court for the Central District of California. On June 4, 2007, the Court conducted a hearing on the plaintiffs' motion for class certification. On June 25, 2007, the Court entered an Order to stay all proceedings in the case pending the Court's ruling on the plaintiffs' motion for class certification. On October 22, 2007, the Court ruled in the plaintiffs' favor, granting the plaintiffs' motion for class certification and certifying a class in the Chicago, New England, New York/New Jersey, Colorado and Southern California regional markets. On November 5, 2007, the Company filed a Petition for Permission to Appeal from Order Granting Class Certification with the U.S. District Court of Appeals for the Ninth Circuit. At a status conference conducted on November 5, 2007, the U.S. District Court extended its stay of all proceedings pending further developments in the U.S. Court of Appeals for the Ninth Circuit. The Company intends to vigorously defend all claims in all of the actions.

The Company is also currently involved in certain other legal proceedings and, as required, has accrued its best estimate of the probable settlement or other losses for the resolution of these claims. These estimates have been developed in consultation with counsel and are based upon an analysis of potential results, assuming a combination of litigation and settlement strategies. It is possible, however, that future results of operations for any particular period could be materially affected by changes in the Company's assumptions or the effectiveness of its strategies related to these proceedings.

NOTE 7 — RELATED-PARTY TRANSACTIONS

Relationship with Clear Channel

Master Separation and Distribution Agreement

The master separation and distribution agreement provides for, among other things, the principal corporate transactions required to effect the transfer of assets and the Company's assumption of liabilities necessary to separate the transferred businesses from Clear Channel, the distribution of the Company's common stock to the holders of record of Clear Channel's common stock on December 14, 2005, and certain other agreements governing the Company's relationship with Clear Channel after the date of the Separation. The transfers from Clear Channel to the Company occurred prior to the Separation and all of the assets were transferred on an "as is," "where is" basis, and the Company and its subsidiaries agreed to bear the economic and legal risks that any conveyance was insufficient to vest in the Company good title, free and clear of any security interest, and that any necessary consents or approvals were not obtained or that any requirements of laws or judgments were not complied with. The Company assumed and agreed to perform and fulfill all of the liabilities arising out of ownership or use of the transferred assets or the operation of the transferred businesses. The Company also agreed, among other things, that for the Company's 2005 fiscal year and for any fiscal year thereafter for so long as Clear Channel is required to consolidate the Company's results of operations and financial position with its results of operations and financial position, the Company will not select an independent registered public accounting firm different from Clear Channel.

Transition Services Agreement

The transition services agreement governs the provision by Clear Channel to the Company of certain transitional administrative and support services such as treasury, payroll and other financial related services; human resources and employee benefits; legal and related services; information systems, network and related services; investment services; and corporate services. The charges for the transition services are intended to allow Clear Channel to fully recover the allocated direct costs of providing the services, plus all out-of-pocket expenses, generally without profit. The allocation of costs is based on various measures depending on the service provided, including relative revenue, employee headcount or number of users of a service. The services will terminate or were terminated at various times after the completion of the Separation. As of September 30, 2007, only information systems related services are still being provided, all of which are expected to be terminated by the end of 2007.

Tax Matters Agreement

The tax matters agreement governs the respective rights, responsibilities and obligations of Clear Channel and the Company with respect to tax liabilities and benefits, tax attributes, tax contests and other matters regarding income taxes, non-income taxes and preparing and filing tax returns, as well as with respect to any additional taxes incurred by the Company attributable to actions, events or transactions relating to the Company's stock, assets or business following the Separation, including taxes imposed if the Separation fails to qualify for tax-free treatment under Section 355 of the Internal Revenue Code of 1986, as amended, or if Clear Channel is not able to recognize certain losses.

[Index to Financial Statements](#)

Employee Matters Agreement

The employee matters agreement provides that the Company will be solely responsible for the majority of the liabilities and expenses relating to the Company's current and former employees and their covered dependents and beneficiaries, regardless of when incurred.

Transactions with Clear Channel Directors

The Company has three non-employee directors on its board of directors that are also directors and executive officers of Clear Channel. These three directors receive directors' fees, stock options and restricted stock awards as do other non-employee members of the Company's board of directors.

Transactions with Clear Channel

From time to time, the Company purchases advertising from Clear Channel and its subsidiaries in the ordinary course of business. For the three months ended September 30, 2007 and 2006 and the nine months ended September 30, 2007 and 2006, the Company recorded an aggregate of \$4.0 million, \$5.6 million, \$9.4 million and \$12.0 million, respectively, as components of direct operating expenses and selling, general and administrative expenses for these advertisements.

Pursuant to the transition services agreement, subsequent to the Separation, Clear Channel provided or provides to the Company certain limited administrative and support services as discussed above. As of September 30, 2007, the only significant services that Clear Channel continues to provide are information systems related services. For the three months ended September 30, 2007 and 2006 and the nine months ended September 30, 2007 and 2006, the Company recorded an aggregate of \$0.2 million, \$1.2 million, \$2.0 million and \$3.8 million, respectively, for these services as components of selling, general and administrative expenses and corporate expenses.

In connection with the Separation, the Company entered into various lease and licensing agreements with Clear Channel primarily for office space occupied by the Company's employees. For the three months ended September 30, 2007 and 2006 and the nine months ended September 30, 2007 and 2006, the Company recorded \$0.2 million, \$0.2 million, \$0.5 million and \$0.5 million respectively, of expense as a component of selling, general and administrative expenses related to these agreements.

As of September 30, 2007, the Company has recorded a liability in accrued expenses to Clear Channel of \$0.2 million for the transition services described above and certain other costs paid for by Clear Channel on the Company's behalf.

Other Relationships

Transactions with Directors

In May 2006, the Company acquired a 50.1% controlling interest in the touring business of a commonly owned group of companies operating under the name of Concert Productions International, or CPI, and a 50% interest in several entities in the non-touring business of CPI (collectively, the "CPI Entities"). Concurrent with the acquisition, Michael Cohl became a member of the Company's board of directors. Mr. Cohl owned a 72.37% interest in Concert Productions International, Inc. ("CPI, Inc.") which, together with other sellers, sold the Company its interests in the CPI Entities. Through his ownership in CPI, Inc., Mr. Cohl indirectly received consideration from the sale of \$72,370 in cash and 54,519 shares of the Company's common stock, which shares are subject to a Lockup and Registration Rights Agreement. SAMCO Investments Ltd. ("Samco") received consideration from the sale of \$7,307,726 in cash and 1,483,906 shares of the Company's common stock, which shares are subject to a Lockup and Registration Rights Agreement. Related to this initial transaction, the CPI Entities entered into a Services Agreement with KSC Consulting (Barbados) Inc. ("KSC Consulting") for the executive services of Mr. Cohl, pursuant to which Mr. Cohl would serve as Chief Executive Officer of the CPI Entities for a term of five years. In addition, the Company entered into a Securityholders Agreement and a Credit Agreement in connection with this transaction. The Securityholders Agreement provided for, among other things, the payment of fees and expenses to CPI, Inc. and CPI Entertainment Rights, Inc., a wholly-owned subsidiary of CPI, Inc., and the Credit Agreement required the Company to make certain extensions of credit to the CPI Entities.

In September 2007, the Company acquired the remaining interests of the CPI Entities. Mr. Cohl, through his ownership in CPI, Inc., indirectly received consideration from the sale of 176,512 shares of the Company's common stock. Mr. Cohl also sold his 5% interest in the touring business of CPI in this transaction and received Trust Certificates evidencing a beneficial interest in 585,366 shares of the Company's common stock, which shares are subject to a Trust Agreement. In addition, Samco sold its 41.25% ownership interest in the touring business of CPI in this transaction and received \$9,276,842 in cash and Trust Certificates evidencing a beneficial interest in 4,829,269 shares of the Company's common stock, which shares are subject to a Trust Agreement. In connection with the closing of the transaction, the Company was informed that Mr. Cohl entered into a non-binding arrangement in December 2006 with Samco and subsequently modified the arrangement

Index to Financial Statements

in September 2007. This non-binding arrangement could be construed as creating a pecuniary interest in favor of Mr. Cohl in up to all of the shares of the Company's common stock owned by Samco. All of the shares of the Company's common stock noted above are subject to a Lockup and Registration Rights Agreement. Finally, KSC Consulting, a consulting company wholly-owned by Mr. Cohl, was entitled to receive \$674,032 of the cash consideration payable to Samco in the transaction. The CPI Entities and the Company have entered into a revised Services Agreement with KSC Consulting which replaces the Services Agreement entered into in the May 2006 transaction. The Services Agreement provides for the executive services of Mr. Cohl, pursuant to which Mr. Cohl serves as Chief Executive Officer and Chairman of the CPI Entities and the Company's Artist Nation division for a term of five years. The Services Agreement also provides that Mr. Cohl be named as the Company's sole Vice Chairman of the Company's Board of Directors and that the board of directors elect a person nominated by Mr. Cohl to the Company's Board of Directors. For the three months ended September 30, 2007 and 2006 and the nine months ended September 30, 2007 and 2006, the Company incurred \$0.3 million, \$0.3 million, \$0.8 million and \$0.3 million, respectively, related to these services with KSC Consulting. As part of this transaction, the Security Holders Agreement and Credit Agreement entered into in the May 2006 transaction were terminated. Mr. Cohl receives stock option awards as do other members of the Company's board of directors.

Other Related Parties

The Company conducts certain transactions in the ordinary course of business with companies that are owned, in part or in total, by various members of management of the Company's subsidiaries. These transactions primarily relate to venue rentals, concession services, equipment rental, ticketing and other services and reimbursement of certain costs. Expenses of \$3.8 million, \$3.3 million, \$8.0 million and \$7.0 million were incurred for the three months ended September 30, 2007 and 2006 and the nine months ended September 30, 2007 and 2006, respectively, and revenues of \$1.3 million, \$0.1 million, \$2.2 million and \$0.2 million were earned for the three months ended September 30, 2007 and 2006 and the nine months ended September 30, 2007 and 2006, respectively, from these companies for services rendered or provided in relation to these business ventures. None of these transactions were with directors or executive officers of the Company.

NOTE 8 — INCOME TAXES

The Company customarily calculates interim effective tax rates in accordance with Accounting Principles Board Opinion 28, *Interim Financial Reporting* ("APB 28"). As required by APB 28, the Company applies the estimated annual effective tax rate to year-to-date pretax income (or loss) at the end of each interim period to compute a year-to-date tax expense (or benefit). FASB Interpretation No. 18 ("FIN 18") requires departure from customary effective tax rate computations when losses incurred within tax jurisdictions cannot be carried back and future profits associated with operations in those tax jurisdictions cannot be assured beyond any reasonable doubt.

Total income tax expense as a percentage of the Company's income (loss) before income taxes is 84% for the nine months ended September 30, 2007. Of the \$33.1 million of total tax, 4% relates to state and local taxes, 2% relates to interest and penalties for uncertain tax positions, and 25% relates to adjustments for significant, unusual and extraordinary items. The remainder of the tax expense relates to statutory tax on profitable operations which are principally operations outside of the United States and reflect an effective tax rate for those jurisdictions of 30%. No tax benefit has been recorded for entities that have losses, as those losses cannot be carried back, and for which future profits associated with such operations in those tax jurisdictions do not meet the more likely than not criteria for asset recognition. The 30% effective tax rate has been applied to year-to-date earnings in taxable jurisdictions for which the Company currently expects to have taxable income. As required by APB 28, the Company also includes tax effects of significant, unusual or extraordinary items in income tax expense in interim periods in accordance with customary requirements.

During the first nine months of 2006, the annual effective tax rate for 2006 was expected to be 38% to 40%. The decrease during 2007 is primarily related to the exclusion, in the computation of the overall estimated annual effective tax rate, of losses from operations for which tax benefits cannot be reasonably assured and the related impact of FIN 18 as discussed above.

In June 2006, the FASB issued FIN 48, which became effective for the Company on January 1, 2007. FIN 48 prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return. For those benefits to be recognized, a tax position must be more likely than not to be sustained upon examination by taxing authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement. As a result of the adoption of FIN 48, the Company recognized no material adjustment in the liability for unrecognized income tax benefits. At the adoption date on January 1, 2007, the Company had \$21.9 million of unrecognized tax benefits, the majority of which would affect the Company's effective tax rate if recognized. At September 30, 2007, the Company had \$22.9 million of unrecognized tax benefits. This change in unrecognized income tax benefits relates solely to pre-2007 uncertain tax positions and is due to additional interest accruals, as described below, and currency fluctuations.

[Index to Financial Statements](#)

The Company recognizes interest and penalties related to uncertain tax positions in income tax expense. For the three and nine months ended September 30, 2007, the Company has recognized \$0.1 million and \$0.7 million, respectively, of interest and penalties related to uncertain tax positions. As of September 30, 2007, the Company has approximately \$3.0 million of accrued interest related to uncertain tax positions.

The tax years 2002 through 2006 remain open to examination by the major tax jurisdictions to which the Company is subject.

NOTE 9 — STOCK-BASED COMPENSATION

In December 2005, the Company adopted its 2005 Stock Incentive Plan. The plan authorizes the Company to grant stock option awards, director shares, stock appreciation rights, restricted stock and deferred stock awards, other equity-based awards and performance awards. The Company has granted options to purchase its common stock to employees, directors and consultants of the Company and its affiliates under the stock incentive plan at no less than the fair market value of the underlying stock on the date of grant. These options are granted for a term not exceeding ten years and the nonvested options are forfeited in the event the employee or director terminates his or her employment or relationship with the Company or one of its affiliates. Any options that have vested at the time of termination are forfeited to the extent they are not exercised within the applicable post-employment exercise period provided in their option agreements. These options vest over one to five years. The stock incentive plan contains anti-dilutive provisions that require the adjustment of the number of shares of the Company's common stock represented by, and the exercise price of, each option for any stock splits or stock dividends.

Stock Options

Effective January 1, 2006, the Company adopted the fair value recognition provisions of FASB Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment* ("Statement 123(R)"), which is a revision of FASB Statement of Financial Accounting Standards No. 123, *Accounting for Stock-Based Compensation*. The Company chose the modified-prospective transition application of Statement 123(R). The fair value of the options is amortized to expense on a straight-line basis over the options' vesting period.

Prior to the adoption of Statement 123(R) and through September 30, 2007, no tax benefits from the exercise of stock options have been recognized. Any future excess tax benefits derived from the exercise of stock options will be recorded prospectively and reported as cash flows from financing activities in accordance with Statement 123(R).

The fair value for options in the Company's stock was estimated on the date of grant using a Black-Scholes option-pricing model. Expected volatilities are based on implied volatilities of traded options and the historical volatility of stocks of similar companies since the Company's common stock does not have sufficient trading history to reasonably predict its own volatility. The Company has used the simplified method for estimating the expected life within the valuation model which is the period of time that options granted are expected to be outstanding. The risk free rate for periods within the life of the option is based on the U.S. Treasury Note rate. The following assumptions were used to calculate the fair value of the Company's options on the date of grant:

	2007	2006
Risk-free interest rate	4.5% - 4.88%	4.71% - 4.86%
Dividend yield	0.0%	0.0%
Volatility factors	28%	28%
Weighted average expected life (<i>in years</i>)	5 - 7.5	5 - 7.5

The following table presents a summary of the Company's stock options outstanding at, and stock option activity during, the nine months ended September 30, 2007 and 2006 ("Price" reflects the weighted average exercise price per share):

	2007		2006	
	Options	Price	Options	Price
	(in thousands, except per share data)			
Outstanding, January 1	2,152	\$11.07	2,078	\$10.60
Granted	2,130	24.39	70	21.80
Exercised	(40)	10.60	—	—
Forfeited or expired	(534)	14.23	(12)	10.60
Outstanding, September 30	<u>3,708</u>	<u>\$18.27</u>	<u>2,136</u>	<u>\$10.97</u>
Exercisable, September 30	34	\$10.60	—	—
Weighted average fair value per option granted		\$ 6.07		\$ 3.77

Index to Financial Statements

The weighted average fair value of stock options granted is required to be based on a theoretical option pricing model. In actuality, because the Company's stock options are not traded on an exchange, option holders can receive no value nor derive any benefit from holding stock options under the plan without an increase in the market price of Live Nation stock. Such an increase in stock price would benefit all shareholders commensurately.

Cash received from stock option exercises for the three and nine months ended September 30, 2007 was \$0.0 million and \$0.4 million. The Company did not realize any actual tax benefit from stock option exercises.

There were 4.8 million shares available for future grants under the stock incentive plan at September 30, 2007. Vesting dates on the stock options range from December 2007 to December 2011, and expiration dates range from December 2012 to May 2017 at exercise prices and average contractual lives as follows:

<u>Range of Exercise Prices</u>	<u>Outstanding as of 9/30/07 (in thousands)</u>	<u>Weighted Average Remaining Contractual Life (in years)</u>	<u>Weighted Average Exercise Price</u>	<u>Exercisable as of 9/30/07 (in thousands)</u>	<u>Weighted Average Exercise Price</u>
\$10.00 - \$14.99	1,623	7.3	\$ 10.60	34	\$ 10.60
\$15.00 - \$19.99	200	10.0	\$ 19.36	—	\$ —
\$20.00 - \$24.99	1,885	9.9	\$ 24.76	—	\$ —

The total intrinsic value of options exercisable as of September 30, 2007 was \$0.1 million.

Restricted Stock Awards

The Company has granted restricted stock awards to its employees and directors under the stock incentive plan. These common shares carry a legend which restricts their transferability for a term of one to five years and are forfeited in the event the recipient's employment or relationship with the Company is terminated prior to the lapse of the restriction. In addition, certain restricted stock awards require the Company to achieve minimum performance targets in order for these awards to vest. Recipients of the restricted stock awards are entitled to all cash dividends as of the date the award was granted. The fair value of the restricted stock is amortized to expense on a straight-line basis over the restricted stock's vesting period.

The following table presents a summary of the Company's restricted stock awards outstanding at September 30, 2007 and 2006 ("Price" reflects the weighted average share price at the date of grant):

	<u>2007</u>		<u>2006</u>	
	<u>Awards</u>	<u>Price</u>	<u>Awards</u>	<u>Price</u>
	<u>(in thousands, except per share data)</u>			
Outstanding, January 1	361	\$12.39	319	\$10.60
Granted	121	24.95	45	20.65
Forfeited	(31)	22.02	(1)	10.60
Vested	(7)	20.85	—	—
Outstanding, September 30	<u>444</u>	<u>\$15.09</u>	<u>363</u>	<u>\$11.85</u>

The Company recorded \$3.4 million, \$0.9 million, \$9.1 million and \$2.4 million of non-cash compensation expense during the three months ended September 30, 2007 and 2006 and nine months ended September 30, 2007 and 2006, respectively, related to nonvested stock-based compensation arrangements for stock options and restricted stock awards with \$1.5 million, \$0.5 million, \$4.3 million and \$1.2 million recorded in selling, general and administrative expenses and \$1.8 million, \$0.4 million, \$4.7 million and \$1.2 million recorded in corporate expenses for the same respective periods. As of September 30, 2007, there was \$21.1 million of total unrecognized compensation cost related to nonvested stock-based compensation arrangements for stock options and restricted stock awards. This cost is expected to be recognized over the next four years.

[Index to Financial Statements](#)

Bonus Incentives

During the third quarter of 2007, the Company entered into arrangements with certain key employees to issue shares of the Company's common stock in lieu of a cash bonus payment if certain divisional financial performance targets are achieved. The Company has recorded \$2.5 million of non-cash compensation expense during the three and nine months ended September 30, 2007 in selling, general and administrative expenses related to bonus incentives.

NOTE 10 — EARNINGS PER SHARE

The Company computes net income per common share in accordance with FASB Statement of Financial Accounting Standards No. 128, *Earnings per Share* ("Statement 128"). Under the provisions of Statement 128, basic net income per common share is computed by dividing the net income applicable to common shares by the weighted average number of common shares outstanding during the period. Diluted net income per common share adjusts basic net income per common share for the effects of stock options, restricted stock and other potentially dilutive financial instruments only in the periods in which such effect is dilutive. In July 2007, the Company issued \$220.0 million of 2.875% convertible notes which are considered in the calculation of diluted net income per common share, if dilutive.

The following table sets forth the computation of basic and diluted net income (loss) per common share:

	<u>Three Months Ended</u>		<u>Nine Months Ended</u>	
	<u>September 30, 2007</u>	<u>September 30, 2006</u>	<u>September 30, 2007</u>	<u>September 30, 2006</u>
	(in thousands, except per share data)			
Numerator:				
Net income (loss)	\$ 41,553	\$ (9,101)	\$ 6,426	\$ 1,698
Effect of dilutive securities:				
2.875% convertible notes	1,542	—	—	—
Numerator for net income (loss) per common share — diluted	\$ 43,095	\$ (9,101)	\$ 6,426	\$ 1,698
Denominator:				
Weighted average common shares	69,398	65,478	66,821	64,643
Effect of dilutive securities:				
Stock options and restricted stock	2,034	—	1,958	761
2.875% convertible notes	6,783	—	—	—
Denominator for net income (loss) per common share — diluted	78,215	65,478	68,779	65,405
Net income (loss) per common share:				
Basic	\$.60	\$ (.14)	\$.10	\$.03
Diluted	\$.55	\$ (.14)	\$.09	\$.03

The calculation of diluted net income (loss) per common share includes the effects of the assumed exercise of any outstanding stock options, the assumed vesting of shares of restricted stock and the assumed conversion of the 2.875% convertible notes where dilutive. For the three months ended September 30, 2006, the Company has excluded all potentially dilutive securities, such as nonvested restricted stock and outstanding options to purchase common stock, from the calculation of diluted net loss per common share because such securities are anti-dilutive. For the three and nine months ended September 30, 2007, the diluted weighted average common shares outstanding excludes the dilutive effect of 1,875,000 stock options since such options have an exercise price in excess of the average market price of the Company's common stock. In addition, for the nine months ended September 30, 2007, the diluted weighted average common shares outstanding excludes 2,285,938 total shares which represents the dilutive effect of 8,104,690 conversion shares related to the Company's \$220.0 million 2.875% convertible notes because such securities are anti-dilutive. For the three months ended September 30, 2006, the diluted weighted average common shares outstanding excludes 907,198 total shares which represents the dilutive effect of 2,499,286 stock options and shares of restricted stock because these securities were anti-dilutive. For the nine months ended September 30, 2006, the diluted weighted average common shares outstanding excludes the dilutive effect of 70,000 stock options since such options have an exercise price in excess of the average market price of the Company's common stock.

In October 2007, the Company issued 1,262,661 shares of common stock in connection with a music-related rights agreement and an acquisition.

NOTE 11 — RECENT DEVELOPMENTS

In July 2007, the Company exercised its option to require Gaiety Investments to contribute its 12% interest in AMG to the joint venture between the Company and Gaiety Investments. Beginning in July 2007, AMG has been consolidated in the Company's financial statements with a total interest through this joint venture of 55.9%. The Company owns 50.1% of this joint venture with Gaiety Investments.

In July 2007, the Company issued \$220.0 million of convertible senior notes due 2027 in a private placement in the United States to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933, as amended. The notes will pay interest semiannually at a rate of 2.875% per annum. The net proceeds from the offering, after deducting estimated offering expenses payable by the Company, were approximately \$212.4 million.

In July 2007, the Company acquired the remaining 49% interest in Musictoday for a combination of cash and shares of the Company's common stock. The shares are subject to lock-up restrictions which release upon the first, second and third anniversaries of issuance. Musictoday is based in the United States and provides services to artists for online fan clubs, artist e-commerce and fulfillment, VIP packaging and artist fan club ticketing.

In August 2007, the Company sold seven small-sized music venues in London for a \$5.5 million gain. The venues sold included Jazz Café, G-A-Y, G-A-Y Late, Borderline, Old Fiddler, Garage and Upstairs at the Garage.

In September 2007, the Company acquired the remaining interests in the CPI entities for 6,097,561 shares of the Company's common stock. The issuance of stock was based on an agreed value of \$125.0 million. In addition, a \$10.0 million cash payment was made related to prior undistributed earnings. Based on the average of the closing prices of the Company's common stock from two trading days before to two trading days after the day of the transaction, or \$20.44, the total purchase price recorded to the Company's financial statements was \$134.6 million. The Company recorded an intangible asset of \$127.7 million related to artist relationships which will be amortized over a nine-year period. The CPI entities are engaged in the business of (i) promoting music concert tours; (ii) acquiring and exploiting intellectual property rights in connection with live entertainment performances, such as DVD rights, merchandise rights, manuscript rights and film rights; and (iii) producing live theatrical shows and other live projects outside of music concert tours. The Company is continuing to evaluate its purchase accounting, including its intangible assets and related useful lives, related to this acquisition.

NOTE 12 — OTHER INFORMATION

Included in gain on sale of operating assets for the three months ended September 30, 2007 is a gain of \$5.5 million related to the sale of seven small-sized music venues in London. For the nine months ended September 30, 2007, in addition to the item noted above, included in gain on sale of operating assets is a \$3.6 million gain related to the sale of Donington Park, an arena/race track in Leicestershire, England. In addition, the Company recorded gains of \$12.3 million, \$0.7 million, and \$0.5 million related to the sale of the Hammersmith Apollo, Forum and Starwood Amphitheater music venues, respectively. The Hammersmith Apollo and Forum music venues are located in London and Starwood Amphitheater is located in Nashville. Finally, the Company recorded a gain of \$6.0 million related to the sale of an office building in San Francisco. Partially offsetting these gains, is an \$8.1 million loss related to the sale of the Company's remaining 50.1% interest in the production of *Phantom: The Las Vegas Spectacular*

Included in gain on sale of operating assets for the nine months ended September 30, 2006 is a \$10.7 million gain recorded for the sale of a portion of the Company's sports representation business assets that were sold in 2006. In addition, the Company recorded a gain of \$1.5 million for certain theatrical assets that were sold during 2006.

Included in other expense (income) – net for the nine months ended September 30, 2006 is income of \$5.9 million related to a fee received on the sale of land in Ireland which was sold in April 2006 to the minority interest holder in this entity. This fee was for payment of services provided by the Company in completing the sale. Under the terms of the original acquisition that included this asset, the Company did not have the rights to the appreciation in the value of this property. The minority interest holder contributed his share of the appreciation in the value of the land to the entity.

NOTE 13 — SEGMENT DATA

Beginning in 2007, the Company reorganized its business units and the way in which these businesses are assessed and therefore changed its reportable segments to North American Music, International Music, Global Artists, Global Digital and Global Theater. Multiple operating segments are aggregated as the reportable segment for Global Artists. The North American Music segment principally involves the promotion of live music events in the Company's owned and/or operated venues and in rented third-party venues and the operation and management of music venues primarily in the United States and Canada. The International Music segment principally involves the promotion of live music events in the Company's

Index to Financial Statements

owned and/or operated venues and in rented third-party venues, the production of music festivals and the operation and management of music venues outside of North America. The Global Artists segment principally involves the promotion and/or production of global music tours as well as providing various services to artists including recorded music and music publishing, merchandise, artist fan sites and ticketing, broadcast/digital media rights, and sponsorship and marketing services. The Global Digital segment principally involves the management of the Company's in-house centralized ticketing operations and online and wireless distribution activities, including the development of the Company's website. The Global Theater segment principally involves the presentation and production of touring and other theatrical performances and the operation and management of theatrical venues. "Other" includes specialized motor sports, sports representation and other businesses.

The Company has reclassified all periods presented to conform to the current period presentation. Revenue and expenses earned and charged between segments are eliminated in consolidation. Corporate expenses, interest income, interest expense, equity in losses (earnings) of nonconsolidated affiliates, minority interest expense (income), other expense (income) — net and income tax expense (benefit) are managed on a total company basis.

There are no customers that individually account for more than ten percent of the Company's consolidated revenues in any year.

NOTE 14 — SUBSEQUENT EVENTS

In November 2007, the Company entered into a definitive agreement to sell its 50% nonconsolidated interest in Broadway in Chicago for \$60 million in cash.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

“Live Nation” (which may be referred to as “we”, “us” or “our”) means Live Nation, Inc. and its subsidiaries, or one of our segments or subsidiaries, as the context requires. You should read the following discussion of our financial condition and results of operations together with the unaudited consolidated financial statements and notes to the financial statements included elsewhere in this quarterly report.

Special Note About Forward-Looking Statements

Certain statements contained in this quarterly report (or otherwise made by us or on our behalf from time to time in other reports, filings with the Securities and Exchange Commission, news releases, conferences, internet postings or otherwise) that are not statements of historical fact constitute “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Exchange Act of 1934, as amended, notwithstanding that such statements are not specifically identified. Forward-looking statements include, but are not limited to, statements about our financial position, business strategy, competitive position, potential growth opportunities, potential operating performance improvements, the effects of competition, the effects of future legislation or regulations and plans and objectives of our management for future operations. We have based our forward-looking statements on our management’s beliefs and assumptions based on information available to our management at the time the statements are made. Use of the words “may,” “should,” “continue,” “plan,” “potential,” “anticipate,” “believe,” “estimate,” “expect,” “intend,” “outlook,” “could,” “target,” “project,” “seek,” “predict” or variations of such words and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements.

Forward-looking statements are not guarantees of future performance and are subject to risks and uncertainties that could cause actual results to differ materially from those in such statements. Factors that could cause actual results to differ from those discussed in the forward-looking statements include, but are not limited to, those set forth under Item 1A. — Risk Factors in both our 2006 Form 10-K and this quarterly report, as well as other factors described herein or in our annual, quarterly and other reports we file with the SEC (collectively, “cautionary statements”). Based upon changing conditions, should any one or more of these risks or uncertainties materialize, or should any underlying assumptions prove incorrect, actual results may vary materially from those described in any forward-looking statements. All subsequent written and oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the applicable cautionary statements. We do not intend to update these forward-looking statements, except as required by applicable law.

Executive Overview

During 2006, our first year as a stand-alone public company, we organized our business into three reportable segments: Events, Venues and Sponsorship and Digital Distribution. As we moved into 2007, we defined our strategy to make Live Nation a live music company rather than a general live entertainment company. To that end, in March 2007, we announced that we are pursuing a potential sale of the majority of our North American theatrical business. In addition, we announced in January 2007, that we reorganized our music business to bring the Events and Venues and Sponsorship divisions under common management in order to ensure the alignment of goals for these two important parts of our business.

As a result of these changes in the operation and management of our business, beginning in 2007 we have now amended our reporting segments to be: North American Music, International Music, Global Artists, Global Digital and Global Theater. In addition, we have operations in the specialized motor sports, sports representation and other businesses, which are included under “other”.

The primary impacts of this change in segments are:

- Ticket sales and show related costs that were previously recorded in our Events segment are now separated between the new segments based on geography and/or type of event.
- Food and beverage, sponsorship, merchandise, rental and other venue ancillary income and venue related costs that were previously recorded in our Venues and Sponsorship segment are now separated between the new segments based on geography and/or type of event.
- Revenues from ticket rebates on tickets sold by third-parties under our ticketing agreements that were previously recorded in our Digital Distribution segment are now recorded with their respective events in the applicable segments.
- Global Digital continues to record a portion of the service charge earned on tickets sold through our in-house centralized ticketing operations.

Index to Financial Statements

- Our specialized motor sports business which was previously included in our Events segment is now recorded as part of other operations.
- Global Artists now includes our artist services businesses such as Musictoday, LLC (Musictoday) and Cinq Group, LLC, which operates as TRUNK, Ltd. (Trunk), which were previously reported in our Digital Distribution and Events segments, respectively.

During the third quarter of 2007 we continued to execute on our strategy to improve and build our core business, comprised of our North American Music, International Music, Global Artists and Global Digital segments and divest non-core operations. The highlights for each of our segments for the third quarter of 2007 were:

North American Music

- The third quarter, the summer, is annually the quarter in which North American Music conducts the majority of its business. During 2007, our goal was to improve the operating results of our amphitheaters versus 2006, stopping the annual declines in operating income we had seen in this business in prior years. We were successful in achieving our goal this summer even as the 2007 summer concert season proved to be weaker than in 2006.
- As part of our strategy to improve financial results at our amphitheaters, we have reduced the number of amphitheater events, excluding *Ozzfest*, with less than 7,500 attendees by 67, or 22.0% from the third quarter of 2006 on a comparative basis. In addition, we were able to improve the food and beverage per attendee (excluding rentals) in the third quarter at our amphitheaters by 5.1% to \$12.47. On the cost side, we reduced our costs as a percentage of revenue at our amphitheaters primarily by better talent buying and reducing show costs.
- Overall, on an actual basis, events promoted by North American Music increased by 1,038 to 3,088 and revenue increased from \$690.9 million to \$785.8 million. These increases were largely the result the acquisitions of HOB Entertainment, Inc. (HOB) and House of Blues Concerts Canada (HOB Canada) that we did not own in the same period of the prior year, offset by our 2007 amphitheater strategy described above to reduce amphitheater events. Overall, on an actual basis, operating income increased by \$46.8 million to \$51.7 million due to the acquisitions described above, reduced depreciation and amortization and improvement in our amphitheaters offset by weaker arena performances.
- In continuation of our strategy to expand our small- and mid-sized venue portfolio in large U.S. markets, in September 2007, we announced we entered into a letter of intent to open a *Fillmore* venue in Silver Springs, Maryland, a suburb of Washington D.C. The venue is expected to open in 2010.

International Music

- The third quarter also is annually the quarter in which International Music conducts the majority of its business. However, from year to year, the timing of certain significant festivals can impact results between the second and third quarter on a comparable basis. During 2007, we experienced an exceptionally strong second quarter and a weaker third quarter, due in part to timing of festivals and various other promotion activities.
- During the quarter, our International Music business was impacted by timing of certain festivals that had more dates during the second quarter than during the third quarter. Overall, our business assimilated the acquisitions of Academy Music Holdings Limited (AMG) (which was consolidated into our financial results beginning in July 2007 as described below), Gamera and Jackie Lombard Productions which were not part of our business during 2006.
- In July 2007, we exercised our option to require Gaiety Investments to contribute its 12% interest in AMG to the joint venture between us and Gaiety Investments (LN Gaiety Holdings) bringing our total ownership interest through this joint venture to 55.9%. We own 50.1% of this joint venture with Gaiety Investments. In September 2007, as part of its strategy to expand its venue portfolio throughout the UK, AMG signed a lease for a new venue in Oxford, England and is refurbishing the existing AMG venue in Brighton, England.
- During August 2007, we were successful in divesting seven non-core, small-sized music venues owned by Mean Fiddler Music Group, in which we had a 50.1% stake through LN Gaiety Holdings. Subsequent to the divestiture, Mean Fiddler Music Group was renamed Festival Republic to focus on its primary festival assets of Carling Weekend Reading & Leeds, Latitude and Glastonbury. In addition, Festival Republic retains two venues, the Astoria and Astoria 2.
- In September 2007, through our LN Gaiety Holdings joint venture, we acquired an additional portion of the land on which we annually stage our successful Reading Festival. We now have control of the substantial majority of the land used for the festival.

Global Artists

- This segment includes the results from our global tours for artists such as Madonna, The Police, Rolling Stones and U2. In addition, it includes our Artist Nation division which partners with artists to help them reach their fullest potential by managing their diverse rights in a unified manner, increasing their fan bases and providing a direct connection to fans through the global distribution platform and marketing proficiencies that have made Live Nation the world's largest live music company. Artist Nation's services include: recorded music and music publishing, merchandise, artist fan sites and artist ticketing, broadcast/digital media rights and sponsorship and marketing.
- During the third quarter of 2007, we produced and/or promoted global tours for The Police, The Rolling Stones, Barbra Streisand and Genesis. The Rolling Stones tour completed in the quarter (August 2007) as the top grossing tour in history with a final gross box office of \$558.3 million attracting over 4.6 million fans.
- In July 2007, we acquired the remaining 49% interest in Musictoday. Musictoday is a leader in connecting artists directly to their fans through online fan clubs, artist e-commerce and fulfillment, VIP packaging and artist fan clubs.
- In September 2007, we acquired the remaining interest in Concert Productions International (CPI) and related companies that we did not already own. As part of the transaction, CPI founder and live music industry revolutionary, Michael Cohl, entered into a long-term services contract to continue to act as Chief Executive Officer of CPI and as Chairman and CEO of our Artist Nation division.
- In October 2007, we announced we had signed Madonna to a 10-year relationship which encompasses Madonna's future music and music-related businesses, including the exploitation of the Madonna brand, a minimum of three new studio albums, touring, merchandising, fan club/web site, DVD's, music-related television and film projects and associated sponsorship agreements. This unique new business model will address all of Madonna's music ventures as a total business enterprise for the first time in her career.
- Also in October 2007, we acquired Anthill Trading (Anthill), a global merchandising company which represents some of the most prestigious icons and trademarked properties in music, entertainment and lifestyle. Anthill has relationships with over 50 artists, including AC/DC, Il Divo, Neil Young, Pink Floyd, John Legend, Pearl Jam, Nelly Furtado, The Police, The Rolling Stones, Run DMC, The Wu Tang Clan, and Frank Zappa.

Global Digital

- This segment includes the results of our in-house centralized ticketing operations and the revenues and costs associated with our website, www.livenation.com. This segment derives the majority of its revenues from service charges earned on tickets sold through our in-house centralized ticketing operations. The tickets sold by this segment are the tickets that we are allowed to sell directly to customers in North America under our agreements with outside ticketing agencies.
- Live Nation's domestic websites collectively continue to be ranked as the second most popular entertainment/event site according to Nielsen//NetRatings with over 3.2 million unique visitors in the month of September 2007. Globally, Live Nation's websites had over 9 million unique visitors in the month of September.
- In July and October 2007, we launched globally consistent designed websites in the United Kingdom and the Netherlands, respectively, which offer fans a powerful concert search engine and special online access to tickets and merchandise. In addition, in October 2007, we announced a partnership with viagogo, Europe's leading online secondary ticketing company, to become our official secondary ticketing partner in the Netherlands.
- Also, in October 2007, we launched additional functionality to our website by providing visitors with 3D seat maps for a number of our amphitheatres.

Global Theater

- This segment includes the results from our North American presenting business (*Broadway Across America*), our United Kingdom theatrical producing and presenting business and our North American and United Kingdom theatrical venues.

[Index to Financial Statements](#)

- In March 2007, we announced that we commenced a process to divest the majority of our North American theatrical business assets. As part of this process, we entered into a definitive agreement in November 2007 to sell our 50% nonconsolidated interest in Broadway in Chicago that we expect to close by the end of 2007. This transaction provides us with proceeds to reinvest in our core business and/or repay debt. The sale process for our other North American theatrical business assets remains ongoing.

Our Separation from Clear Channel

We were formed through acquisitions of various entertainment businesses and assets by our predecessors. On August 1, 2000, Clear Channel Communications, Inc. (Clear Channel) acquired our entertainment business. On August 2, 2005, we were incorporated in our current form as a Delaware corporation to own substantially all of the entertainment business of Clear Channel. On December 21, 2005, the separation of the business previously conducted by Clear Channel's live entertainment segment and sports representation business, now comprising our business, and the distribution by Clear Channel of all of our common stock to its shareholders, was completed in a tax free spin-off. Following our separation from Clear Channel, we became a separate publicly traded company on the New York Stock Exchange trading under the symbol "LYV".

Segment Overview

Beginning in 2007, we reorganized our business units and the way in which these businesses are assessed and therefore changed our reportable segments to North American Music, International Music, Global Artists, Global Digital and Global Theater. In addition, we have operations in the specialized motor sports, sports representation and other businesses which are included under "other". Previously, we operated in three reportable business segments: Events, Venues and Sponsorship, and Digital Distribution. In addition, previously included under "other" were our operations in the sports representation and other businesses. We have reclassified all periods presented to conform to the current period presentation.

North American Music

Our North American Music segment principally involves the promotion of live music events in our owned and/or operated venues and in rented third-party venues. While our North American Music segment operates year-round, we experience higher revenues during the second and third quarters due to the seasonal nature of shows at our outdoor amphitheaters, which primarily occur May through September.

As a promoter, we typically book performers, arrange performances and tours, secure venues, provide for third-party production services, sell tickets and advertise events to attract audiences. We earn revenues primarily from the sale of tickets and pay performers under one of several formulas, including a fixed guaranteed amount and/or a percentage of ticket sales or show profits. For each event, we either use a venue we own and/or operate, or rent a third-party venue. Revenues are generally related to the number of events, volume of ticket sales and ticket prices. Event costs, included in direct operating expenses, such as artist and production service expenses, are typically substantial in relation to the revenues. As a result, significant increases or decreases in promotion revenue do not typically result in comparable changes to operating income.

As a venue operator, we contract with promoters to rent our venues for events and we provide operational services such as concessions, merchandising, parking, security, ushering and ticket-taking. We generate revenues primarily from the sale of food and beverages, parking, premium seating, venue sponsorships and ticket rebates earned on tickets sold through phone, outlet and internet by third-parties under our ticketing agreements for events we promote. In our amphitheaters, the sale of food and beverages is outsourced and we receive a share of the net revenues from the concessionaire which is recorded in revenue with no significant direct operating expenses associated with it. Revenues generated from venue operations typically have a higher margin than promotion revenues and therefore typically have a more direct relationship to operating income.

We actively pursue the sale of national and local sponsorships and placement of advertising, including signage and promotional programs. Many of our venues also have venue naming rights sponsorship programs. We believe national sponsorships allow us to maximize our network of venues and to arrange multi-venue branding opportunities for advertisers. Our national sponsorship programs have included companies such as American Express, Anheuser Busch, Nokia and Verizon. Our local and venue-focused sponsorships include venue signage, promotional programs, on-site activation, hospitality and tickets, and are derived from a variety of companies across various industry categories.

To judge the health of our North American Music segment, management primarily monitors the number of confirmed events in our network of owned and/or operated and third-party venues, talent fees, average paid attendance and advance ticket sales. In addition, at our owned and/or operated venues, management monitors attendance, food and beverage sales per attendee, premium seat sales and corporate sponsorship sales.

International Music

Our International Music segment principally involves the promotion of live music events in our owned and/or operated venues and in rented third-party venues and the production of music festivals. While our International Music segment operates year-round, we experience higher revenues during the second and third quarters due to the seasonal nature of our international festivals, which primarily occur June through August.

As a promoter, we typically book performers, arrange performances and tours, secure venues, provide for third-party production services, sell tickets and advertise events to attract audiences. We earn revenues primarily from the sale of tickets and pay performers under one of several formulas, including a fixed guaranteed amount and/or a percentage of ticket sales or show profits. For each event, we either use a venue we own and/or operate, or rent a third-party venue. Revenues are generally related to the number of events, volume of ticket sales and ticket prices. Event costs, included in direct operating expenses, such as artist and production service expenses, are typically substantial in relation to the revenues. As a result, significant increases or decreases in promotion revenue do not typically result in comparable changes to operating income.

As a venue operator, we contract with promoters to rent our venues for events and we provide operational services such as concessions, merchandising, security, ushering and ticket-taking. We generate revenues primarily from rental income, the sale of food and beverages, venue sponsorships and ticket rebates earned on tickets sold through phone, outlet and internet by third-parties under our ticketing agreements for events we promote. Revenues generated from venue operations typically have a higher margin than promotion revenues and therefore typically have a more direct relationship to operating income.

To judge the health of our International Music segment, management primarily monitors the number of confirmed events in our network of owned and/or operated and third-party venues, talent fees, average paid attendance and advance ticket sales. In addition, at our owned and/or operated venues, management monitors attendance and food and beverage sales per attendee. Because this business is conducted in foreign markets, management looks at the operating results from our foreign operations on a constant dollar basis.

Global Artists

Our Global Artists segment principally involves the production and/or promotion of global music tours as well as providing various services to artists. While our Global Artists segment operates year-round, the timing of tours of top-grossing acts can impact comparability of quarterly results year over year, although annual results may not be impacted.

As a producer, we generally hire artistic talent, develop sets and coordinate the actual performances of the events. We usually produce tours on a global basis. We generate revenues by sharing in a percentage of event or tour profits primarily related to the sale of tickets, merchandise and event and tour sponsorships. These production revenues are generally related to the size and profitability of the music tour. Artist and production costs, included in direct operating expenses, are typically substantial in relation to the revenues. As a result, significant increases or decreases in revenue related to these music tours do not typically result in comparable changes to operating income.

In addition to global touring services, our Global Artist segment includes our newly formed Artist Nation division. Artist Nation was formed to partner with artists to manage their diverse rights, grow their fan bases and provide a direct connection to fans through our global distribution platform and marketing proficiencies. The division is comprised of recorded music and music publishing, merchandise, artist fan sites and ticketing, broadcast/digital media rights, and sponsorship and marketing services. Artist Nation currently generates revenue primarily through the sale of fan club memberships, artist and special event ticketing and merchandise. Direct operating expenses include the artist's share of profit and cost of goods sold.

To judge the health of our Global Artists segment, management primarily monitors the number of confirmed events, paid attendance and tour contribution margin. In addition, for our Artist Nation services, management monitors the number of artist clients and revenue per artist client.

Global Digital

Our Global Digital segment is creating the new internet and digital platform for Live Nation. This segment is involved in managing our in-house ticketing operations and online and wireless distribution activities, including the development of our website. This segment derives the majority of its revenues from service charges earned on tickets sold through our in-house centralized ticketing operations and sponsorships. The tickets sold by this segment are the tickets that we are allowed to sell directly to customers in North America under our agreements with outside ticketing agencies. For these tickets, Global Digital pays our North American Music and Global Theater segments a ticket rebate equivalent to the amount that they would have received had the ticket been sold by an outside ticketing agency. The remainder of the service charge is retained by Global Digital.

[Index to Financial Statements](#)

To judge the health of our Global Digital segment, management primarily reviews the number of tickets sold through our in-house centralized ticketing operations and the number of unique visitors to our websites.

Global Theater

Our Global Theater segment principally involves the presentation and production of touring and other theatrical performances, owning and/or operating theatrical venues and selling sponsorships and advertising. While our Global Theater segment operates year-round, we experience higher revenues during the first, second and fourth quarters as the theatrical touring season typically runs from September to April.

As a presenter, we typically book touring theatrical performances of revivals of previous commercial successes and new productions of theatrical performances playing on Broadway in New York or the West End in London. We pre-sell tickets for our touring and other theatrical performances through one of the largest subscription series, *Broadway Across America*, in the United States and Canada. We occasionally invest in the theatrical shows or productions to obtain touring rights and favorable scheduling to distribute them across our presentation network. Revenues are generally related to the number of events, volume of ticket sales and ticket prices. Event costs, included in direct operating expenses, such as touring company and production service expenses, are typically substantial in relation to the revenues. As a result, significant increases or decreases in presentation revenue do not typically result in comparable changes to operating income.

We derive revenues from our theater venue operations primarily from rental income, sponsorships, concessions, merchandise and ticket rebates earned on tickets sold through phone, outlet and internet by third-parties under our ticketing agreements for events we present. For each theatrical event we host, we typically receive a fixed fee for the use of the venue, as well as fees representing a percentage of total concession sales from the vendors and total merchandise sales from the performer or tour producer. Revenues generated from theater venue operations typically have a higher margin than presentation revenues and therefore typically have a more direct relationship to operating income.

To judge the health of our Global Theater segment, management primarily monitors the number of confirmed events, average show profit, paid attendance and advance ticket sales. In addition, at our owned and/or operated theater venues, management monitors attendance, food and beverage sales per attendee and corporate sponsorship sales. Because a portion of our global theater business is conducted in foreign markets, management looks at the operating results from our foreign operations on a constant dollar basis.

Note: Events and attendance information for our exhibitions and sports representation businesses have been excluded as the majority of these businesses were either sold or shut down during 2006. Promotions listed above include events in our owned and/or operated venues as well as events we promote in third-party venues. Certain adjustments have been made to the 2006 three- and nine-month and 2007 nine-month events and attendance information.

Revenue

Our revenue increased \$179.5 million, or 13%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to increases in revenue in our North American Music and Global Artists segments of \$94.9 million and \$109.1 million, respectively, partially offset by decreases in revenue in our Global Theater segment and other operations of \$20.7 million and \$17.4 million, respectively. Included in the increase in revenue for the three months ended September 30, 2007 is approximately \$37.1 million from increases in foreign exchange rates as compared to the same period of 2006.

Our revenue increased \$518.5 million, or 20%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to increases in revenue in our North American Music, International Music and Global Artists segments of \$279.2 million, \$108.0 million and \$164.1 million, respectively, partially offset by decreases in revenue in our Global Theater segment and other operations of \$11.4 million and \$35.9 million, respectively. Included in the increase in revenue for the nine months ended September 30, 2007 is approximately \$78.9 million from increases in foreign exchange rates as compared to the same period of 2006.

More detailed explanations of the three- and nine-month changes are included in the applicable segment discussions contained herein.

Direct operating expenses

Our direct operating expenses increased \$144.8 million, or 13%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to increases in direct operating expenses in our North American Music and Global Artists segments of \$64.1 million and \$104.8 million, respectively, partially offset by decreases in direct operating expenses in our Global Theater segment and other operations of \$25.5 million and \$11.0 million, respectively.

Index to Financial Statements

Included in the increase in direct operating expenses for the three months ended September 30, 2007 is approximately \$30.9 million from increases in foreign exchange rates as compared to the same period of 2006.

Our direct operating expenses increased \$398.5 million, or 19%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to increases in direct operating expenses in our North American Music, International Music and Global Artists segments of \$184.9 million, \$88.7 million and \$147.5 million, respectively, partially offset by decreases in direct operating expenses in our Global Theater segment and other operations of \$16.6 million and \$17.3 million, respectively. Included in the increase in direct operating expenses for the nine months ended September 30, 2007 is approximately \$62.7 million from increases in foreign exchange rates as compared to the same period of 2006.

Direct operating expenses include artist fees, show related marketing and advertising expenses along with other costs.

More detailed explanations of the three- and nine-month changes are included in the applicable segment discussions contained herein.

Selling, general and administrative expenses

Our selling, general and administrative expenses increased \$26.7 million, or 19%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to an increase in selling, general and administrative expenses in our North American Music segment of \$17.7 million. Included in the increase in selling, general and administrative expenses for the three months ended September 30, 2007 is approximately \$3.7 million from increases in foreign exchange rates as compared to the same period of 2006.

Our selling, general and administrative expenses increased \$106.0 million, or 28%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to increases in selling, general and administrative expenses in our North American Music, International Music and Global Artists segments of \$79.6 million, \$17.4 million and \$23.9 million, respectively, partially offset by a decrease in our other operations of \$15.7 million. Included in the increase in selling, general and administrative expenses for the nine months ended September 30, 2007 is approximately \$11.3 million from increases in foreign exchange rates as compared to the same period of 2006.

More detailed explanations of the three- and nine-month changes are included in the applicable segment discussions contained herein.

Depreciation and amortization

Our depreciation and amortization decreased \$35.6 million, or 57%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to decreases in depreciation and amortization in our North American Music and Global Theater segments of \$32.9 million and \$4.1 million, respectively, partially offset by an increase in depreciation and amortization in our Global Artists segment of \$2.4 million. Of the total decrease, \$42.1 million is due to venue impairments recorded in 2006.

Our depreciation and amortization decreased \$14.2 million, or 15%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to decreases in depreciation and amortization in our North American Music and Global Theater segments of \$24.2 million and \$3.4 million, respectively, partially offset by an increase in depreciation and amortization in our Global Artists segment of \$8.5 million. Of the total decrease, \$42.1 million is due to venue impairments recorded in 2006.

More detailed explanations of the three- and nine-month changes are included in the applicable segment discussions contained herein.

Gain on sale of operating assets

Our gain on sale of operating assets increased \$4.0 million during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to a gain recorded in 2007 on the sale of seven small-sized venues in London. Partially offsetting this increase in the gain on sale of operating assets were gains recorded in 2006 related to the sale of portions of our sports representation business assets.

Our gain on sale of operating assets increased \$9.4 million during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to gains recorded in 2007 on the sale of an arena/race track in Leicestershire, England, an amphitheater in Nashville, an office building in San Francisco, two mid-sized music venues in London and seven small-sized venues in London, partially offset by an \$8.1 million loss recorded in 2007 on the sale of our ownership interest in the production of *Phantom: The Las Vegas Spectacular*. Partially offsetting this increase in the gain on

[Index to Financial Statements](#)

sale of operating assets were gains recorded in 2006 on the sale of a portion of our sports representation business assets and the sale of certain show-related prepaid production assets, theatrical productions and investments in nonconsolidated affiliates.

Corporate expenses

Corporate expenses increased \$3.7 million, or 49%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to \$1.4 million of higher non-cash compensation expense for additional stock-based awards and increased headcount and related costs for corporate functions.

Corporate expenses increased \$7.5 million, or 32%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to increased headcount related to the building of corporate functions previously provided by Clear Channel and \$3.6 million of higher non-cash compensation expense for additional stock-based awards, partially offset by a reduction in rent expense in our New York office due to subleasing of available space.

Interest expense

Interest expense increased \$6.4 million and \$20.5 million during the three and nine months ended September 30, 2007, respectively, as compared to the same periods of the prior year primarily due to interest expense related to our additional term loan which we obtained in the fourth quarter of 2006, our convertible notes which were issued in the third quarter of 2007, borrowings under the revolving credit facility during the period and amortization of additional debt issuance costs.

Our debt balances and weighted average cost of debt, including redeemable preferred stock, were \$813.4 million and 6.79%, respectively, at September 30, 2007, and \$406.0 million and 7.97%, respectively, at September 30, 2006.

Interest income

Interest income increased \$2.2 million during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to interest income earned on HOB Entertainment, Inc. (HOB) purchase price held in escrow and excess cash invested in money market funds and other short-term investments.

Equity in earnings of nonconsolidated affiliates

Equity in earnings of nonconsolidated affiliates decreased \$1.8 million and \$1.9 million during the three and nine months ended September 30, 2007, respectively, as compared to the same periods of the prior year. The decrease for the three-month period was primarily due to a \$3.6 million correction in the accounting for a non-music touring production acquired with Concert Productions International (CPI), partially offset by increases in earnings from our investment in a German concert promotion company and a reduction of losses from our investment in a joint venture with Cirque Du Soleil. The decrease for the nine-month period was primarily due to a loss from our investment in a joint venture with Cirque Du Soleil, partially offset by earnings from investments acquired with HOB and stronger results for our investment in Broadway in Chicago.

Other income — net

Other income decreased \$2.0 million during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to a fee received on the sale of land in Ireland during the second quarter of 2006, partially offset by a loss recorded in 2006 on a decrease in the value of stock investments received as part of a contractual obligation which was completed in the first quarter of 2007.

Income Taxes

We customarily calculate interim effective tax rates in accordance with Accounting Principles Board Opinion 28, *Interim Financial Reporting* (APB 28). As required by APB 28, we apply the estimated annual effective tax rate to year-to-date pretax income (or loss) at the end of each interim period to compute a year-to-date tax expense (or benefit). Financial Accounting Standards Board (FASB) Interpretation No. 18 (FIN 18) requires departure from customary effective tax rate computations when losses incurred within tax jurisdictions cannot be carried back and future profits associated with operations in those tax jurisdictions cannot be assured beyond any reasonable doubt.

Total income tax expense as a percentage of our income (loss) before income taxes is 84% for the nine months ended September 30, 2007. Of the \$33.1 million of total tax, 4% relates to state and local taxes, 2% relates to interest and penalties for uncertain tax positions, and 25% relates to adjustments for significant, unusual and extraordinary items. The remainder of the tax expense relates to statutory tax on profitable operations which are principally operations outside of the United States and reflect an effective tax rate for those jurisdictions of 30%. No tax benefit has been recorded for entities that have losses,

[Index to Financial Statements](#)

as those losses cannot be carried back, and for which future profits associated with such operations in those tax jurisdictions do not meet the more likely than not criteria for asset recognition. The 30% effective tax rate has been applied to year-to-date earnings in taxable jurisdictions for which we currently expect to have taxable income. As required by APB 28, we also include tax effects of significant, unusual or extraordinary items in income tax expense in interim periods in accordance with customary requirements.

During the first nine months of 2006, the effective tax rate for 2006 was expected to be 38% to 40%. The decrease during 2007 is primarily related to the exclusion, in the computation of the overall estimated annual effective tax rate, of losses from operations for which tax benefits cannot be reasonably assured and the related impact of FIN 18 as discussed above. These effective tax rates result in a net tax expense of \$11.8 million and \$24.3 million for the three months ended September 30, 2007 and 2006 and \$33.1 million and \$30.4 million for the nine months ended September 30, 2007 and 2006, respectively.

North American Music Results of Operations

Our North American Music segment operating results were as follows:

(in thousands)	Three Months Ended September 30,		% Change	Nine Months Ended September 30,		% Change
	2007	2006		2007	2006	
Revenue	\$785,862	\$690,932	14%	\$1,491,788	\$1,212,619	23%

Operating margin	6.6%	0.7%		1.7%	(1.7)%	

** Percentages are not meaningful.

Three Months

North American Music revenue increased \$94.9 million, or 14%, during the three months ended September 30, 2007 as compared to the same period of the prior year due to \$157.1 million of revenue related to our acquisitions of HOB during the fourth quarter of 2006 and HOB Canada during the second quarter of 2007. This increase was partially offset by a decrease in revenue primarily due to a decline in the number of events at our owned and/or operated amphitheaters.

North American Music direct operating expenses increased \$64.1 million, or 11%, during the three months ended September 30, 2007 as compared to the same period of the prior year due to \$127.8 million of direct operating expenses related to our acquisitions of HOB during 2006 and HOB Canada during 2007. This increase was partially offset by a decrease in direct operating expenses primarily due to a decline in the number of events and reduced show costs at our owned and/or operated amphitheaters. The net increase in direct operating expenses was less than the increase in revenue due to better talent buying and reduced show costs at our amphitheaters and due to HOB clubs, acquired in 2006, having lower direct operating expenses as a percentage of revenue as compared to our other promotion and venue operation businesses.

North American Music selling, general and administrative expenses increased \$17.7 million, or 27%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to \$17.4 million of selling, general and administrative expenses related to our acquisitions of HOB during 2006 and HOB Canada during 2007. In addition, we experienced incremental expenses related to the commencement of the Dodge Theater operating agreement in January 2007, the Hollywood Palladium operating agreement in April 2007 and *The Fillmore* Miami Beach at the Jackie Gleason Theater operating agreement in June 2007. These increases were partially offset by decreases in marketing, repairs and maintenance, consultant and travel and entertainment expenses due to the implementation of cost savings initiatives.

North American Music depreciation and amortization expense decreased \$32.9 million, or 72%, during the three months ended September 30, 2007 as compared to the same period of the prior year due to an impairment of \$37.9 million recorded during 2006 related to several amphitheaters. This decrease was partially offset by \$4.6 million of additional depreciation and amortization expense primarily due to amortization of the intangible assets resulting from our acquisition of HOB during 2006 which were recorded as part of the purchase price allocations.

Index to Financial Statements

The increase in operating income for North American Music was primarily a result of operating income from our HOB and HOB Canada acquisitions, improved results at our owned and/or operated amphitheatres and decreased depreciation expense due to the amphitheater impairments recorded in 2006, partially offset by reduced activity for arena events.

Nine Months

North American Music revenue increased \$279.2 million, or 23%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to \$294.0 million of revenue related to our acquisitions of HOB during the fourth quarter of 2006 and HOB Canada during the second quarter of 2007.

North American Music direct operating expenses increased \$184.9 million, or 18%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to \$207.5 million of direct operating expenses related to our acquisitions of HOB during 2006 and HOB Canada during 2007. The net increase in direct operating expenses was less than the increase in revenue primarily due to better talent buying and reduced show costs at our amphitheatres and due to HOB clubs, acquired in 2006, having lower direct operating expenses as a percentage of revenue as compared to our other promotion and venue operation businesses.

North American Music selling, general and administrative expenses increased \$79.6 million, or 47%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to \$62.3 million of selling, general and administrative expenses related to our acquisitions of HOB during 2006 and HOB Canada during 2007. In addition, we experienced an increase in legal expenses of \$4.5 million related to ongoing cases and incremental expenses related to the commencement of the Dodge Theater operating agreement in January 2007, the Hollywood Palladium operating agreement in April 2007 and *The Fillmore* Miami Beach at the Jackie Gleason Theater operating agreement in June 2007.

North American Music depreciation and amortization expense decreased \$24.2 million, or 39%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to an impairment of \$37.9 million recorded during 2006 related to several amphitheatres. This decrease was partially offset by \$14.6 million of depreciation and amortization expense primarily due to amortization of the intangible assets resulting from our acquisition of HOB during 2006 which were recorded as part of the purchase price allocations.

North American Music gain on sale of operating assets increased \$6.8 million during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to the sale of an office building in San Francisco and the sale of the Starwood Amphitheater in Nashville.

The increase in operating income for North American Music was primarily a result of operating income from our HOB and HOB Canada acquisitions, improved results at our owned and/or operated amphitheatres, decreased depreciation expense due to the amphitheater impairments recorded in 2006, and the gains recorded in 2007 on the sale of an office building and an amphitheater.

International Music Results of Operations

Our International Music segment operating results were as follows:

<u>(in thousands)</u>	<u>Three Months Ended</u> <u>September 30,</u>		<u>%</u> <u>Change</u>	<u>Nine Months Ended</u> <u>September 30,</u>		<u>%</u> <u>Change</u>
	<u>2007</u>	<u>2006</u>		<u>2007</u>	<u>2006</u>	
Revenue	\$334,358	\$330,028	1%	\$774,183	\$666,228	16%
Direct operating expenses	268,483	264,018	2%	612,291	523,610	17%
Selling, general and administrative expenses	37,972	31,907	19%	103,538	86,136	20%

** Percentages are not meaningful.

Three Months

International Music revenue increased \$4.3 million, or 1%, during the three months ended September 30, 2007 as compared to the same period of the prior year. Excluding the increase related to the impact of changes in foreign exchange rates of \$29.5 million, revenue actually decreased \$25.2 million, or 8%, primarily due to a decline in revenue for our United Kingdom operations driven by a reduction in the number of large outdoor tours and the timing of the *Hyde Park Calling* festival which occurred in the second quarter of 2007 and the third quarter of 2006, partially offset by an increase in revenue from the *Global Gathering* festival. In addition, we experienced a decline in revenue related to the sale of the Hammersmith Apollo, Forum and seven small-sized music venues during the second and third quarters of 2007. Also, Belgium revenue declined due to fewer days of the *Rock Werchter* festival occurring in the third quarter of 2007 as compared to the same period of the prior year. Partially offsetting these decreases was increased revenue for our other European operations driven by increased promotion activity in Finland, Norway and Italy. Also offsetting the decrease was incremental revenue of \$25.4 million, prior to intersegment eliminations, related to the effect of acquisitions in France and Spain and our acquisition of AMG since the same period in the prior year.

International Music direct operating expenses increased \$4.5 million, or 2%, during the three months ended September 30, 2007 as compared to the same period of the prior year. Excluding the increase related to the impact of changes in foreign exchange rates of \$24.7 million, direct operating expenses actually decreased \$20.2 million, or 8%, primarily due to the reduction in revenue for our United Kingdom operations noted above. Partially offsetting this decrease was an increase in direct operating expenses related to the increased revenue for our other European operations noted above. Also offsetting the decrease was incremental direct operating expenses of \$17.4 million, prior to intersegment eliminations, related to the effect of acquisitions since the same period in the prior year.

International Music selling, general and administrative expenses increased \$6.1 million, or 19%, during the three months ended September 30, 2007 as compared to the same period of the prior year. Excluding the increase related to the impact of changes in foreign exchange rates of \$2.7 million, the increase in selling, general and administrative expenses was \$3.4 million, or 11%, primarily due to \$4.4 million of selling, general and administrative expenses related to the acquisitions made since the same period in the prior year.

International Music depreciation and amortization expense decreased \$2.0 million, or 35%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to decreased depreciation related to the sale of the Hammersmith Apollo, Forum and seven small-sized music venues during the second and third quarters of 2007. Partially offsetting this decrease was incremental depreciation and amortization expense of \$1.2 million related to acquisitions since the same period in the prior year.

International Music gain on sale of operating assets increased \$6.6 million during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to the sale of seven small-sized music venues in London in August 2007.

Overall, the increase in operating income for International Music in the third quarter of 2007 as compared to the same period of 2006 was primarily due to the gain recorded on the sale of the seven small-sized music venues noted above. In addition, our recent acquisitions in Spain and France and our acquisition of AMG improved overall operating income in the third quarter of 2007 due to the timing of events in these markets. However, these improvements were partially offset by reduced operating income from timing of festivals and reduced promotion activity for our United Kingdom operations.

Nine Months

International Music revenue increased \$108.0 million, or 16%, during the nine months ended September 30, 2007 as compared to the same period of the prior year. Excluding the increase related to the impact of changes in foreign exchange rates of \$64.8 million, the increase in revenue was \$43.2 million, or 6%, primarily due to incremental revenue of \$76.9 million, prior to intersegment eliminations, related to the effect of acquisitions in France and Spain since the same period in the prior year, our acquisition of AMG in July 2007 and the addition of the Wembley Arena operating agreement in the United Kingdom in April 2006. We also experienced an increase in revenues from our other European operations driven by increased promotion activity in Finland, Norway and Italy. These increases were partially offset by decreases in revenue for our United Kingdom operations driven by the sale of the Hammersmith Apollo, Forum and seven small-sized music venues during the second and third quarters of 2007.

International Music direct operating expenses increased \$88.7 million, or 17%, during the nine months ended September 30, 2007 as compared to the same period of the prior year. Excluding the increase related to the impact of changes in foreign exchange rates of \$52.9 million, the increase in direct operating expenses was \$35.8 million, or 7%, primarily due to incremental direct operating expenses of \$60.9 million, prior to intersegment eliminations, related to the acquisitions since the same period in the prior year

Index to Financial Statements

and the addition of the Wembley Arena operating agreement. Our direct operating expenses also increased due to the improved results for our other European operations noted above. These increases were partially offset by decreases in direct operating expenses for our United Kingdom operations noted above.

International Music selling, general and administrative expenses increased \$17.4 million, or 20%, during the nine months ended September 30, 2007 as compared to the same period of the prior year. Excluding the increase related to the impact of changes in foreign exchange rates of \$8.2 million, the increase in selling, general and administrative expenses was \$9.2 million, or 11%, primarily due to \$9.8 million of selling, general and administrative expenses related to the acquisitions made since the same period in the prior year and the addition of the Wembley Arena operations.

International Music depreciation and amortization expense increased \$2.3 million, or 25%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to incremental depreciation and amortization expense of \$1.3 million related to the effect of acquisitions since the same period in the prior year.

International Music gain on sale of operating assets increased \$19.8 million during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to the sale of the Hammersmith Apollo and Forum mid-sized venues and the seven small-sized music venues in London.

Overall, the increase in operating income for International Music in the first nine months of 2007 as compared to the same period of 2006 was primarily due to gains recorded on the sale of the two mid-sized and seven small-sized music venues noted above. In addition, our recent acquisitions in Spain and France and our acquisition of AMG improved overall operating income in the first nine months of 2007. However, these improved results were partially offset by lower operating income resulting from the sale of the venues noted above for our United Kingdom operations.

Global Artists Results of Operations

Our Global Artists segment operating results were as follows:

(in thousands)	Three Months Ended September 30,			%	Nine Months Ended September 30,		
	2007	2006	Change		2007	2006	Change
Revenue	\$352,091	\$242,953	45%	\$503,519	\$339,437	48%

** Percentages are not meaningful.

Three Months

Global Artists revenue increased \$109.1 million, or 45%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to an increase in attendance for our global tours with artists such as The Police, The Rolling Stones, Barbra Streisand and Genesis touring during the third quarter of 2007. In addition, the increase includes \$37.0 million of revenue related to the correction in accounting made during the third quarter of 2007 for the first and second quarter results of a non-music touring production acquired with CPI.

Global Artists direct operating expenses increased \$104.8 million, or 47%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to the increase in attendance for our global tours. In addition, the increase includes \$32.3 million of direct operating expenses related to the correction in accounting for the non-music touring production acquired with CPI noted above.

Global Artists selling, general and administrative expenses increased \$5.2 million, or 58%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to increased salary and consultant expense related to increased headcount for Artist Nation and incremental selling, general and administrative expenses related to our acquisition of Musictoday in September 2006. In addition, the increase includes \$1.0 million of selling, general and administrative expenses related to the correction in accounting for the non-music touring production acquired with CPI noted above.

Index to Financial Statements

Global Artists depreciation and amortization expense increased \$2.4 million during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to amortization of the intangible assets resulting from our 2006 and 2007 acquisitions of CPI.

The decrease in operating income for Global Artists is principally a result of additional selling, general and administrative expenses and the amortization of the intangible assets from our acquisition of CPI.

Nine Months

Global Artists revenue increased \$164.1 million, or 48%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to incremental revenues of \$98.9 million related to our acquisitions of CPI, Trunk and Musictoday during the second and third quarters of 2006. Excluding the CPI global tours, our other global touring revenue increased primarily due to an increase in attendance. Tours during 2007 include The Rolling Stones, The Who, Barbra Streisand, The Police, Genesis and a non-music touring production.

Global Artists direct operating expenses increased \$147.5 million, or 48%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to incremental direct operating expenses of \$79.9 million related to our acquisitions of CPI, Trunk and Musictoday during 2006. In addition, we experienced an increase in other global touring direct operating expenses due to the increased attendance.

Global Artists selling, general and administrative expenses increased \$23.9 million, or 166%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to incremental expenses of \$19.3 million related to our 2006 acquisitions of CPI, Trunk and Musictoday. In addition, we experienced an increase in selling general and administrative expenses due to increased salary and consultant expense related to increased headcount and activity for Artist Nation.

Global Artists depreciation and amortization expense increased \$8.5 million during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to amortization of the intangible assets resulting from our 2006 and 2007 acquisitions of CPI.

The increased operating loss for Global Artists is principally a result of the amortization of intangible assets related to our acquisition of CPI and the timing, size and/or type of touring events during 2007 as compared to 2006.

Global Digital Results of Operations

Our Global Digital segment operating results were as follows:

(in thousands)	Three Months Ended September 30,			Nine Months Ended September 30,		
	2007	2006	% Change	2007	2006	% Change

** Percentages are not meaningful.

Three Months

Global Digital revenues increased \$2.2 million, or 82%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to increased ticket service charge rebates and sponsorship revenues associated with our in-house ticketing operations.

Global Digital direct operating expenses increased \$0.8 million, or 106%, during the three months ended September 30, 2007 as compared to the same period of the prior year due to increased in-house ticketing costs.

[Index to Financial Statements](#)

Global Digital selling, general and administrative expenses increased \$0.6 million, or 19%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to increased salary related to new staff and consultant expenses related to our website and internet management.

Global Digital depreciation and amortization expense increased \$0.9 million during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to depreciation expense related to our website development.

Nine Months

Global Digital revenues increased \$3.8 million, or 73%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to increased sponsorship revenues and ticket service charge rebates associated with our in-house ticketing operations.

Global Digital direct operating expenses increased \$0.6 million, or 38%, during the three months ended September 30, 2007 as compared to the same period of the prior year due to the increased in-house ticketing costs.

Global Digital selling, general and administrative expenses increased \$2.4 million, or 29%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to increased salary related to new staff and consultant expenses related to our website and internet management.

Global Digital depreciation and amortization expense increased \$1.8 million during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to depreciation expense related to our website development.

Global Theater Results of Operations

Our Global Theater segment operating results were as follows:

(in thousands)	Three Months Ended September 30,		%	Nine Months Ended September 30,		%
	2007	2006		Change	2007	
Revenue	\$55,979	\$76,715	(27)%	\$254,375	\$265,733	(4)%
Direct operating expenses	32,509	57,962	(44)%	166,743	183,374	(9)%
Selling, general and administrative expenses	20,526	20,099	2%	62,436	64,037	(3)%

Operating margin	(2.0)%	(12.0)%		2.1%	1.9%	

** Percentages are not meaningful.

Three Months

Global Theater revenue decreased \$20.7 million, or 27%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to reductions in the number of events and attendance for our North American presenting markets and the sale of our interest in the production of *Phantom: The Las Vegas Spectacular* which opened during the third quarter of 2006. Our interest in this production was sold effective March 2007.

Global Theater direct operating expenses decreased \$25.5 million, or 44%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to the reduction in the number of events for our North American presenting markets and the sale of our interest in the production of *Phantom: The Las Vegas Spectacular* noted above. During the third quarter of 2007, we experienced a slight increase in the number of fixed fee events, as opposed to events where we recognize all the revenue and direct operating expenses, which resulted in a greater decrease in direct operating expenses as compared to the decrease in revenue.

Global Theater depreciation and amortization expense decreased \$4.1 million, or 51%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to an impairment of \$4.2 million recorded during 2006 primarily related to a theater development project.

[Index to Financial Statements](#)

Nine Months

Global Theater revenue decreased \$11.4 million, or 4%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to an increase in the number of fixed fee events for our North American presenting markets, as opposed to events where we recognize all the revenue and direct operating expense. In addition, we sold our interest in the production of *Phantom: The Las Vegas Spectacular* which opened during the third quarter of 2006. Our interest in this production was sold effective March 2007. These decreases were partially offset by increases in our United Kingdom operations driven by strong results from our production of *Chicago* and increased rental, merchandise and concession revenues for our United Kingdom theatrical theaters due to an increase in the number of events and related attendance driven by shows such as *Wicked* and *The Producers*.

Global Theater direct operating expenses decreased \$16.6 million, or 9%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to an increase in the number of fixed fee events for our North American presenting markets and the sale of our interest in the production of *Phantom: The Las Vegas Spectacular* noted above. These decreases were partially offset by the strong results from our United Kingdom theatrical productions and theaters noted above.

Global Theater depreciation and amortization expense decreased \$3.4 million, or 22%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to an impairment of \$4.2 million recorded during 2006 primarily related to a theater development project.

Global Theater loss on sale of operating assets increased \$10.1 million during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to a loss of \$8.1 million from the sale of our 50.1% interest in the production of *Phantom: The Las Vegas Spectacular*.

Other Results of Operations

Our other operating results were as follows:

<u>(in thousands)</u>	<u>Three Months Ended</u> <u>September 30,</u>		<u>%</u> <u>Change</u>	<u>Nine Months Ended</u> <u>September 30,</u>		<u>%</u> <u>Change</u>
	<u>2007</u>	<u>2006</u>		<u>2007</u>	<u>2006</u>

** Percentages are not meaningful.

Three Months

Other revenues decreased \$17.4 million, or 48%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily as a result of the loss of revenue due to the sale of portions of our sports representation business assets and the sale of Donington Park in the United Kingdom.

Other direct operating expenses decreased \$11.0 million, or 46%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to the sale of portions of our sports representation business assets and the sale of Donington Park.

Other selling, general and administrative expenses decreased \$3.3 million, or 34%, during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to the sale of portions of our sports representation business assets and the sale of Donington Park.

Other loss on sale of operating assets increased \$3.1 million during the three months ended September 30, 2007 as compared to the same period of the prior year primarily due to gains recorded in 2006 on the sale of portions of our sports representation business assets related to football, tennis, media and baseball.

[Index to Financial Statements](#)

Nine Months

Other revenues decreased \$35.9 million, or 20%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily as a result of the loss of revenues due to the sale of portions of our sports representation business assets and the sale of Donington Park in the United Kingdom.

Other direct operating expenses decreased \$17.3 million, or 15%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to the sale of portions of our sports representation business assets, the sale of Donington Park and a decline in costs related to certain DVD/CD production and distribution projects.

Other selling, general and administrative expenses decreased \$15.7 million, or 38%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to the sale of portions of our sports representation business assets and the sale of Donington Park.

Other depreciation and amortization expense decreased \$1.2 million, or 53%, during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to the sale of Donington Park.

Other gain on sale of operating assets decreased \$7.2 million during the nine months ended September 30, 2007 as compared to the same period of the prior year as the gain recorded in 2007 on the sale of Donington Park, an arena/race track in Leicestershire, England, was less than the gain on the sale of a portion of our sports representation business assets recorded in 2006.

Liquidity and Capital Resources

Our working capital requirements and capital for our general corporate purposes, including acquisitions and capital expenditures, are funded from operations or from borrowings under our senior secured credit facility described below. Our cash is currently managed on a worldwide basis. Repatriation of some of these funds could be subject to delay and could have potential tax consequences, principally with respect to withholding taxes paid in foreign jurisdictions which do not give rise to a tax benefit in the United States due to our current inability to realize foreign tax credits.

Our balance sheet reflects cash and cash equivalents of \$351.3 million and current and long-term debt of \$773.4 million at September 30, 2007, and cash and cash equivalents of \$313.9 million and current and long-term debt of \$639.1 million at December 31, 2006. These debt balances do not include our outstanding redeemable preferred stock.

We may need to incur additional debt or issue equity to make other strategic acquisitions or investments. We cannot assure that such financing will be available to us on acceptable terms or that such financing will be available at all. Our ability to issue additional equity may be constrained because the issuance of additional stock may cause the Distribution to be taxable under section 355(e) of the Internal Revenue Code, and, under our tax matters agreement with Clear Channel, we would be required to indemnify Clear Channel against the tax, if any. We may make significant acquisitions in the near term, subject to limitations imposed by our financing documents, market conditions and the tax matters agreement.

We generally receive cash related to ticket revenues in advance of the event, which is recorded in deferred revenue until the event occurs. With the exception of some upfront costs and artist deposits, which are recorded in prepaid expenses until the event occurs, we pay the majority of event-related expenses at or after the event. We view our available cash as cash and cash equivalents, less event-related deferred revenue, less accrued expenses due to artists and for cash collected on behalf of others, plus event-related prepaids. This is essentially our cash available to, among other things, repay debt balances, make acquisitions, repurchase stock and finance revenue-generating capital expenditures.

[Index to Financial Statements](#)

Our intra-year cash fluctuations are impacted by the seasonality of our various businesses. Examples of seasonal effects include our North American Music and International Music segments, which report the majority of their revenues in the second and third quarters, while our Global Theater segment reports the majority of its revenues in the first, second and fourth quarters of the year. Cash inflows and outflows depend on the timing of event-related payments but the majority of the inflows generally occur prior to the event. See “— Seasonality” below. We believe that we have sufficient financial flexibility to fund these fluctuations and to access the global capital markets on satisfactory terms and in adequate amounts, although there can be no assurance that this will be the case. We expect cash flow from operations and borrowings under our senior secured credit facility, along with potential additional financing alternatives, to satisfy working capital, capital expenditure and debt service requirements for at least the succeeding year.

Sources of Cash

Senior Secured Credit Facility

We have a senior secured credit facility consisting of a term loan in the original amount of \$325 million and a \$285 million revolving credit facility. The revolving credit facility provides for borrowings up to the amount of the facility with sub-limits of up to \$235 million to be available for the issuance of letters of credit and up to \$100 million to be available for borrowings in foreign currencies. The term loan and revolving credit portions of the credit facility mature in June 2013 and June 2012, respectively. We are required to make minimum quarterly principal repayments under the original term loan of approximately \$3.2 million per year through March 2013, with the remaining balance due at maturity. We are required to prepay the outstanding term loan, subject to certain exceptions and conditions, from certain asset sale proceeds and casualty and condemnation proceeds that we do not reinvest within a 365-day period or from certain additional debt issuance proceeds.

In connection with the HOB acquisition in November 2006, we entered into an Incremental Assumption Agreement and Amendment No. 1 to our senior secured credit facility. This amendment increased the amount available under the senior secured credit facility by providing for an additional \$200 million term loan which matures in December 2013. We are required to make minimum quarterly principal repayments under this additional term loan of approximately \$2.0 million per year through September 2013, with the remaining balance due at maturity.

In December 2006, we entered into Amendment No. 2 to our senior secured credit facility. This amendment provides that all term loans under the credit facility bear interest at per annum floating rates equal, at our option, to either (a) the base rate (which is the greater of the prime rate offered by JPMorgan Chase Bank, N.A. or the federal funds rate plus 0.5%) plus 1.75% or (b) Adjusted LIBOR plus 2.75%.

In December 2006, we entered into an Incremental Assumption Agreement and Amendment No. 3 to our senior secured credit facility. This amendment increases the amount available under the senior secured credit facility by providing for an additional \$25 million term loan which matures in December 2013. We are required to make minimum quarterly principal repayments under this additional term loan of approximately \$0.3 million per year through September 2013, with the remaining balance due at maturity.

In June 2007, we entered into an Amended and Restated Credit Agreement (the Amended Credit Agreement) which amends and restates our existing senior secured credit agreement to modify certain covenants and other provisions and facilitate potential future acquisitions. The Amended Credit Agreement consists of a \$550 million term loan facility and a \$285 million revolving credit facility, with the right, subject to certain conditions, to increase such facilities by up to \$250 million in the aggregate. The revolving credit facility provides for borrowings up to the amount of the facility with sub-limits of up to \$235 million to be available for the issuance of letters of credit and up to \$100 million to be available for borrowings in foreign currencies. Under the Amended Credit Agreement, revolving loans bear interest at an annual rate of LIBOR plus 1.75%, subject to stepdowns based on the Company's leverage ratio at the time of borrowing, and term loans bear interest at an annual rate of LIBOR plus 2.75%.

During the three and nine months ended September 30, 2007, we made principal payments totaling \$91.1 million and \$93.9 million on the term loans, respectively, and \$38.0 million and \$153.0 million on the revolving credit facility, respectively. The payments on the revolving credit facility were primarily to repay short-term borrowings used to fund working capital requirements during the year. At September 30, 2007, the outstanding balances on the term loans and revolving credit facility were \$452.9 million and \$0 million, respectively. Taking into account letters of credit of \$43.9 million, \$241.1 million was available for future borrowings.

As of November 2, 2007, the outstanding balances on the term loans and revolving credit facility were \$452.9 million and \$33.0 million, respectively. Taking into account letters of credit of \$45.2 million, \$206.8 million was available for future borrowings.

Index to Financial Statements

Convertible Senior Notes

In July 2007, we issued \$220.0 million of convertible senior notes due 2027 in a private placement in the United States to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933. The notes will pay interest semiannually at a rate of 2.875% per annum. Beginning with the period commencing on July 20, 2014 and ending on January 14, 2015, and for each of the interest periods commencing thereafter, we will pay contingent interest on the notes if the average trading price of the notes during the five consecutive trading days ending on the second trading day immediately preceding the first day of the applicable interest period equals or exceeds 120% of the principal amount of the notes. The contingent interest payable per note will equal 0.25% per year of the average trading price of such note during the applicable five trading-day reference period, payable in arrears. The notes will be convertible, under certain circumstances, at an initial conversion rate of 36.8395 shares per \$1,000 principal amount of notes, which represents a 27.5% conversion premium based on the last reported sale price of \$21.29 per share on July 10, 2007. Upon conversion, the notes may be settled in shares of Live Nation common stock or, at our election, cash or a combination of cash and shares of Live Nation common stock. The net proceeds from the offering, after deducting estimated offering expenses payable by us, were approximately \$212.4 million.

Holders of the convertible senior notes may require us to purchase for cash all or a portion of their notes on July 15, 2014, July 15, 2017 and July 15, 2022 at a price equal to 100% of the principal amount plus accrued and unpaid interest, if any, subject to specified additional conditions. In addition, if we experience a fundamental change, as defined in the indenture governing the notes, holders may require us to purchase for cash all or a portion of their notes, subject to specified exceptions, at a price equal to 100% of the principal amount of the notes plus accrued and unpaid interest, if any.

We may not redeem the convertible senior notes prior to July 20, 2014. On or after July 20, 2014, we may redeem all or a portion of the notes for cash at a price equal to 100% of the principal amount being redeemed plus accrued and unpaid interest, if any.

Redeemable Preferred Stock

As part of the Separation, one of our subsidiaries sold 200,000 shares of Series A (voting) mandatorily Redeemable Preferred Stock to third-party investors and issued 200,000 shares of Series B (non-voting) mandatorily Redeemable Preferred Stock to Clear Channel which then sold this Series B Redeemable Preferred Stock to third-party investors. We did not receive any of the proceeds from the sale of the Series B Redeemable Preferred Stock sold by Clear Channel. As of September 30, 2007, we had 200,000 shares of Series A Redeemable Preferred Stock and 200,000 shares of Series B Redeemable Preferred Stock outstanding (collectively, the Preferred Stock) with an aggregate liquidation preference of \$40 million. The Preferred Stock accrues dividends at 13% per annum and is mandatorily redeemable on December 21, 2011, although we are obligated to make an offer to repurchase the Preferred Stock at 101% of the liquidation preference in the event of a change of control.

In June 2007, we entered into an Amended and Restated Certificate of Incorporation governing the Redeemable Preferred Stock (the Amended Preferred Stock Agreement) which amends and restates the existing certificate of incorporation to modify certain covenants and other provisions and facilitate potential future acquisitions. The Amended Preferred Stock Agreement contains a covenant that requires us to pay additional dividends in the event the ratio of consolidated total indebtedness minus unrestricted cash and cash equivalents, up to a maximum of \$150 million (all as defined by the Amended Preferred Stock Agreement), to consolidated earnings-before-interest-taxes-depreciation-and-amortization (as defined by the Amended Preferred Stock Agreement) exceeds 4.0 times.

The Amended Preferred Stock Agreement contains a number of covenants that, among other things, restrict our ability to incur additional debt, issue certain equity securities, create liens, merge or consolidate, modify the nature of our business, make certain investments and acquisitions, transfer and sell material assets, enter into sale-leaseback transactions, enter into swap agreements, pay dividends and make distributions, and enter into agreements with affiliates. If we default under any of these covenants, we will have to pay additional dividends.

At September 30, 2007, we were in compliance with all Redeemable Preferred Stock covenants. We expect to remain in compliance with all of our Redeemable Preferred Stock covenants throughout 2007.

Guarantees of Third-Party Obligations

As of September 30, 2007, we guaranteed the debt of third parties of approximately \$3.1 million, primarily related to maximum credit limits on employee and tour related credit cards and guarantees of bank lines of credit of a nonconsolidated affiliate and a third-party promoter. In addition, in connection with the sale of a portion of our sports representation business assets, we guaranteed the performance of a third-party related to an employment contract in the amount of approximately \$0.5 million.

Index to Financial Statements

During 2006, in connection with our acquisition of Historic Theatre Group, we guaranteed obligations related to a lease agreement. In the event of default, we could be liable for obligations which have future lease payments (undiscounted) of approximately \$45.3 million through the end of 2035.

Disposal of Assets

During the nine months ended September 30, 2007, we received \$72.0 million of proceeds primarily related to the sales of the Apollo Hammersmith and Forum mid-sized venues in London, Donington Park, an arena/race track in Leicestershire, England, seven small-sized music venues in London, an office building in San Francisco, the Starwood Amphitheater in Nashville, our remaining 50.1% interest in the production of *Phantom: The Las Vegas Spectacular* and a small-sized music venue in Cleveland, Ohio. These proceeds are presented net of any cash included in the assets sold.

Debt Covenants

The significant covenants on our multi-currency senior secured credit facility relate to total leverage, senior leverage, interest coverage, and capital expenditures contained and defined in the credit agreement. The adjusted leverage ratio covenant requires us to maintain a ratio of consolidated total indebtedness minus unrestricted cash and cash equivalents, up to a maximum of \$150 million (all as defined by the credit agreement), to consolidated earnings-before-interest-taxes-depreciation-and-amortization (as defined by the credit agreement, "Adjusted Consolidated EBITDA") of less than 4.5 times through June 30, 2008, and less than 4.0 times thereafter, provided that aggregated subordinated indebtedness and permitted holding company indebtedness (as defined by the credit agreement) is less than \$25 million or 6.0 times if greater than \$25 million. The senior leverage covenant, which is only applicable provided aggregate subordinated indebtedness and permitted holding company indebtedness is greater than \$25 million, requires us to maintain a ratio of adjusted consolidated senior indebtedness minus unrestricted cash and cash equivalents to Adjusted Consolidated EBITDA of less than 4.5 times through March 31, 2008 and 4.0 times thereafter. The interest coverage covenant requires us to maintain a minimum ratio of Adjusted Consolidated EBITDA to cash interest expense (as defined by the credit agreement) of 2.5 times. The capital expenditure covenant limits annual capital expenditures (as defined by the credit agreement) to \$110 million or less. In the event that we do not meet these covenants, we are considered to be in default on the credit facilities at which time the credit facilities may become immediately due. This credit facility contains a cross default provision that would be triggered if we were to default on any other indebtedness greater than \$10 million.

Our other indebtedness does not contain provisions that would make it a default if we were to default on our credit facilities.

The interest rate we pay on borrowings on our senior term loans is 2.75% above LIBOR. The interest rate we pay on our \$285 million multi-currency revolving credit facility depends on our total leverage ratio. Based on our current total leverage ratio, our interest rate on revolving credit borrowings is 1.75% above LIBOR. In addition to paying interest on outstanding principal under the credit facility, we are required to pay a commitment fee to the lenders under the revolving credit facility in respect of the unutilized commitments. As of September 30, 2007, the commitment fee rate was 0.375%. We also are required to pay customary letter of credit fees, as necessary. In the event our leverage ratio improves, the interest rate on revolving credit borrowings declines gradually to 0.75% at a total leverage ratio of less than, or equal to, 1.25 times.

Other than the convertible notes, we believe there are no other agreements that contain provisions that trigger an event of default upon a change in long-term debt ratings that would have a material impact on our financial statements.

At September 30, 2007, we were in compliance with all debt covenants. We expect to remain in compliance with all of our debt covenants throughout 2007.

Uses of Cash

Acquisitions

When we make acquisitions, especially of entities where we buy a controlling interest only, the acquired entity may have cash on its balance sheet at the time of acquisition. All amounts discussed in this section are presented net of any cash acquired. During the nine months ended September 30, 2007, we used \$76.1 million in cash for acquisitions in our various segments, as follows: our North American Music segment acquired the remaining interest in HOB Canada, a live music company located in Canada which operates or has booking rights for one amphitheater and three small-sized music venues in Toronto and Vancouver, and acquired an interest in Bamboozle, LLC, a festival promotion company located in the United States; our International Music segment acquired an interest in Jackie Lombard, a concert promotion company in France, an interest in AMG, a live music company located in the United Kingdom which owns and/or operates 12 music venues, along with payment of an additional working capital adjustment related to our acquisition of Gamerco, S.A. in December 2006; and, finally, our Global Artists segment acquired the remaining 49% interest in Trunk, a specialty merchandise company,

[Index to Financial Statements](#)

located in the United States, that acquires licenses primarily from music artists to design, manufacture and sell merchandise through various distribution channels, the remaining 49% interest in Musictoday which provides services to artists for online fan clubs, artist e-commerce and fulfillment, VIP packaging and artist fan club and secondary market ticketing, and the remaining interests in the CPI entities which engage in full service global tours, provide certain artist services and invest in theatrical productions.

Capital Expenditures

Venue operations is a capital intensive business, requiring consistent investment in our existing venues in order to address audience and artist expectations, technological industry advances and various federal, state and/or local regulations.

We categorize capital outlays into maintenance capital expenditures and revenue generating capital expenditures. Maintenance capital expenditures are associated with the renewal and improvement of existing venues and, to a lesser extent, capital expenditures related to information systems, web development and administrative offices. Revenue generating capital expenditures relate to either the construction of new venues or major renovations to existing buildings or buildings that are being added to our venue network. Capital expenditures typically increase during periods when venues are not in operation.

Our capital expenditures consisted of the following:

<u>(in thousands)</u>	<u>Nine Months Ended September 30,</u>	
	<u>2007</u>	<u>2006</u>
Maintenance capital expenditures	\$30,695	\$40,786
Revenue generating capital expenditures	36,250	10,244
Total capital expenditures	\$66,945	\$51,030

While maintenance capital expenditures for the first nine months of 2007 reflect a decrease over the same period of the prior year, we expect the level of maintenance capital expenditures for the full year to be approximately \$50.0 million which is consistent with 2006 total expenditures. We continue to improve the audience experience at our owned and/or operated venues.

We expect the level of revenue generating capital expenditures for the full year to significantly increase over 2006 primarily due to the timing of capital expenditures associated with the development and renovation of various venues including The Point in Ireland and the *House of Blues* club in Dallas. In addition, we expect to invest additional capital in transforming our venues into wired studios to expand on the distribution opportunities of the live concert experience. Revenue generating capital expenditures increased during the first nine months of 2007 as compared to the same period of the prior year primarily due to the development of the *House of Blues* club in Dallas, the acquisition of an additional portion of the land on which we annually stage our Reading Festival and the wiring of our venues into live studios.

Summary

Our primary short-term liquidity needs are to fund general working capital requirements and capital expenditures while our long-term liquidity needs are primarily acquisition related. Our primary sources of funds for our short-term liquidity needs will be cash flows from operations and borrowings under our senior secured credit facility, while our long-term sources of funds will be from cash from operations, long-term bank borrowings and other debt or equity financing.

Cash Flows

<u>(in thousands)</u>	<u>Nine Months Ended September 30,</u>	
	<u>2007</u>	<u>2006</u>
Cash provided by (used in):		
Operating activities	\$ 34,362	\$101,185
Investing activities	\$(59,838)	\$ (9,502)
Financing activities	\$ 63,011	\$ 1,238

Operating Activities

Cash provided by operations was \$34.4 million for the nine months ended September 30, 2007, compared to \$101.2 million for the nine months ended September 30, 2006. The \$66.8 million decrease in cash provided by operations

[Index to Financial Statements](#)

primarily resulted from changes in the event-related operating accounts which are dependent on the number and size of events for upcoming periods. We paid more accrued event related expenses during the first nine months of 2007 as compared to the same period of 2006 resulting in a decrease to cash provided by operating activities. In addition, the accounts receivable increase was higher due to the timing and number of events in the first nine months of 2007 as compared to the same period of 2006 resulting in a decrease to cash provided by operations. Finally, the other assets increase was higher primarily due to advances under long-term artist arrangements resulting in a decrease to cash provided by operating activities. Conversely, we received more deferred revenue in the first nine months of 2007 as compared to the same period of 2006 resulting in an increase to cash provided by operations. These changes in event-related operating accounts are impacted by the timing, size and number of events related to music activity in the period.

Investing Activities

Cash used in investing activities was \$59.8 million for the nine months ended September 30, 2007, as compared to \$9.5 million for the nine months ended September 30, 2006. The \$50.3 million increase in cash used in investing activities is primarily due to our acquisitions of an interest in AMG, and the remaining interests in HOB Canada, Musictoday and CPI during 2007. In addition, our capital expenditures increased during the nine months ended September 30, 2007 as compared to the same period of the prior year primarily due to the development of the *House of Blues* club in Dallas, the acquisition of an additional portion of the land on which we annually stage our Reading Festival and the wiring of our venues into live studios. These increases were partially offset by higher proceeds received from the divestiture of the Apollo Hammersmith and Forum mid-sized venues in London, Donington Park in Leicestershire, England, seven small-sized music venues in London, an office building in San Francisco, the Starwood Amphitheater in Nashville, our remaining 50.1% interest in the production of *Phantom: The Las Vegas Spectacular* and a small-sized music venue in Cleveland, Ohio.

Financing Activities

Cash provided by financing activities was \$63.0 million for the nine months ended September 30, 2007, as compared to \$1.2 million for the nine months ended September 30, 2006. The \$61.8 million increase in cash provided by financing activities was primarily a result of proceeds received from the issuance of our 2.875% convertible notes partially offset by net payments made on our revolving credit facility.

Seasonality

Our North American Music and International Music segments typically experience higher operating income in the second and third quarters as our outdoor venues and international festivals are primarily used or occur during May through September. Our Global Theater segment typically experiences its higher operating income during the first, second and fourth quarters of the calendar year as the theatrical touring season typically runs from September through April. In addition, the timing of tours of top-grossing acts in our Global Artists segment can impact comparability of quarterly results year over year, although annual results may not be impacted.

Cash flows from our North American Music, International Music and Global Theater segments typically have a slightly different seasonality as payments are often made for artist performance fees and production costs in advance of the date the related event tickets go on sale. These artist fees and production costs are expensed when the event occurs. Once tickets for an event are put on sale, we begin to receive payments from ticket sales, still in advance of when the event occurs. We record these ticket sales as revenue when the event occurs.

Market Risk

We are exposed to market risks arising from changes in market rates and prices, including movements in foreign currency exchange rates and interest rates.

Foreign Currency Risk

We have operations in countries throughout the world. The financial results of our foreign operations are measured in their local currencies. As a result, our financial results could be affected by factors such as changes in foreign currency exchange rates or weak economic conditions in the foreign markets in which we have operations. Currently, we do not operate in any hyper-inflationary countries. Our foreign operations reported operating income of \$78.5 million for the nine months ended September 30, 2007. We estimate that a 10% change in the value of the United States dollar relative to foreign currencies would change our operating income for the nine months ended September 30, 2007 by \$7.8 million. As of September 30, 2007, our primary foreign exchange exposure included the Euro, British Pound, Swedish Kroner and Canadian Dollar.

Index to Financial Statements

This analysis does not consider the implication such currency fluctuations could have on the overall economic conditions of the United States or other foreign countries in which we operate or on the results of operations of our foreign entities.

Occasionally, we will use forward currency contracts to reduce our exposure to foreign currency risk. The principal objective of such contracts is to minimize the risks and/or costs associated with artist fee commitments. At September 30, 2007, we had no outstanding forward currency contracts.

Interest Rate Risk

Our market risk is also affected by changes in interest rates. We had \$773.4 million total debt outstanding as of September 30, 2007. Of the total amount, we have interest rate hedges with an aggregate notional amount of \$162.5 million, an additional interest rate swap with a notional amount of \$29.3 million, \$276.5 million of fixed rate debt and \$305.1 million of floating-rate debt.

Based on the amount of our floating-rate debt as of September 30, 2007, each 25 basis point increase or decrease in interest rates would increase or decrease our annual interest expense and cash outlay by approximately \$0.8 million. This potential increase or decrease is based on the simplified assumption that the level of floating-rate debt remains constant with an immediate across-the-board increase or decrease as of September 30, 2007 with no subsequent change in rates for the remainder of the period.

We currently use interest rate swaps to reduce our exposure to market risk from changes in interest rates. We do not intend to hold or issue interest rate swaps for trading purposes. The accounting for changes in the fair value of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship, and further, on the type of hedging relationship. For derivative instruments that are designated and qualify as hedging instruments, we must designate the hedging instrument, based upon the exposure being hedged, as a fair value hedge, cash flow hedge or a hedge of a net investment in a foreign operation. We formally document all relationships between hedging instruments and hedged items, as well as its risk management objectives and strategies for undertaking various hedge transactions. We formally assess, both at inception and at least quarterly thereafter, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in either the fair value or cash flows of the hedged item. If a derivative ceases to be a highly effective hedge, we discontinue hedge accounting. We account for our derivative instruments that are not designated as hedges at fair value with changes in fair value recorded in current earnings during the period of change.

For derivative instruments that are designated and qualify as a fair value hedge (i.e., hedging the exposure to changes in the fair value of an asset or a liability or an identified portion thereof that is attributable to a particular risk), the gain or loss on the derivative instrument as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in the same line item associated with the hedged item in current earnings during the period of the change in fair values (for example, in interest expense when the hedged item is fixed-rate debt). For derivative instruments that are designated and qualify as a cash flow hedge (i.e., hedging the exposure to variability in expected future cash flows that is attributable to a particular risk), the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income (loss) and reclassified into earnings in the same line item associated with the forecasted transaction in the same period or periods during which the hedged transaction affects earnings (for example, in interest expense when the hedged transactions are interest cash flows associated with floating-rate debt). The remaining gain or loss on the derivative instrument in excess of the cumulative change in the present value of future cash flows of the hedged item, if any, is recognized in other expense (income) — net in current earnings during the period of change. For derivative instruments that are designated and qualify as a hedge of a net investment in a foreign currency, the gain or loss is reported in other comprehensive income (loss) as part of the cumulative translation adjustment to the extent it is effective. Any ineffective portions of net investment hedges are recognized in other expense (income) — net in current earnings during the period of change.

In March 2006, we entered into two separate interest rate swaps for which we purchased a series of interest rate caps and sold a series of interest rate floors with a \$162.5 million aggregate notional amount that effectively converts a portion of our floating-rate debt to a fixed-rate basis. These agreements expire in March 2009. The fair value of these agreements at September 30, 2007 was a liability of \$0.9 million. These agreements were put in place to eliminate or reduce the variability of a portion of the cash flows from the interest payments related to the senior secured credit facility. The terms of the senior secured credit facility required that an interest rate swap be put in place for at least 50% of the original \$325 million senior term loan and for at least three years.

As part of the acquisition of AMG, we now have interest rate swap agreements with a \$29.3 million aggregate notional amount that effectively converts a portion of our floating-rate debt to a fixed-rate basis. These agreements expire in January 2015. These interest rate swap agreements have not been designated as hedging instruments. Therefore, any change in fair value is recorded in earnings during the period of the change.

Index to Financial Statements

In July 2007, we issued \$220.0 million of convertible senior notes due 2027. Beginning with the period commencing on July 20, 2014 and ending on January 14, 2015, and for each of the interest periods commencing thereafter, we will pay contingent interest on the notes if the average trading price of the notes during the five consecutive trading days ending on the second trading day immediately preceding the first day of the applicable interest period equals or exceeds 120% of the principal amount of the notes. The contingent interest payable per note will equal 0.25% per year of the average trading price of such note during the applicable five trading-day reference period, payable in arrears.

Ratio of Earnings to Fixed Charges

The ratio of earnings to fixed charges is as follows:

<u>Nine Months Ended September 30,</u>		<u>Year Ended December 31,</u>				
<u>2007</u>	<u>2006</u>	<u>2006</u>	<u>2005</u>	<u>2004</u>	<u>2003</u>	<u>2002</u>
1.51	1.63	0.96	0.07	1.18	2.04	1.40

The ratio of earnings to fixed charges was computed on a total enterprise basis. Earnings represent income from continuing operations before income taxes less equity in undistributed net income (loss) of nonconsolidated affiliates plus fixed charges. Fixed charges represent interest, amortization of debt discount and expense, and the estimated interest portion of rental charges. Rental charges exclude variable rent expense for events in third-party venues. Prior period calculations have been revised to conform to the current period presentation.

Stock-Based Compensation

As of September 30, 2007, there was \$21.1 million of total unrecognized compensation cost related to nonvested stock-based compensation arrangements for stock options and restricted stock awards. This cost is expected to be recognized over the next four years.

Recent Accounting Pronouncements

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes — an interpretation of FASB Statement No. 109* (FIN 48). FIN 48 creates a single model to address uncertainty in tax positions. FIN 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006. We adopted FIN 48 on January 1, 2007, as required. See further discussion of the effect adoption of FIN 48 had on our financial position and results of operations in Item 1. — Financial Statements — Notes to Consolidated Financial Statements — Note 8.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (Statement 157). Statement 157 provides guidance for using fair value to measure assets and liabilities and also responds to investors' requests for expanded information about the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value, and the effect of fair value measurements on earnings. Statement 157 applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. Statement 157 does not expand the use of fair value in any new circumstances. Statement 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The provisions of Statement 157 are applied prospectively with retrospective application to certain financial instruments. We will adopt Statement 157 on January 1, 2008 and are currently assessing the impact its adoption will have on our financial position and results of operations.

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (Statement 159). Statement 159 allows entities to voluntarily choose, at specified election dates, to measure many financial assets and financial liabilities (as well as certain nonfinancial instruments that are similar to financial instruments) at fair value (the fair value option). The election is made on an instrument-by-instrument basis and is irrevocable. If the fair value option is elected for an instrument, Statement 159 specifies that all subsequent changes in fair value for that instrument will be reported in earnings. Statement 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. Upon initial adoption, Statement 159 provides entities with a one-time chance to elect the fair value option for existing eligible items. The effect of the first measurement to fair value

[Index to Financial Statements](#)

should be reported as a cumulative-effect adjustment to the opening balance of retained earnings in the year of adoption. We will adopt Statement 159 on January 1, 2008 and are currently assessing the impact its adoption will have on our financial position and results of operations.

In August 2007, the FASB issued for comment an exposure draft of a proposed FASB Staff Position APB 14-a ("Proposed FSP") that would change the accounting for certain convertible debt instruments, including our 2.875% convertible senior notes. Under the proposed new rules, for convertible debt instruments that may be settled entirely or partially in cash upon conversion, an entity should separately account for the liability and equity components of the instrument in a manner that reflects the issuer's economic interest cost. The effect of the proposed new rules for our 2.875% convertible senior notes is that the equity component would be included in the additional paid-in capital section of shareholders' equity on our balance sheet and the value of the equity component would be treated as an original issue discount for purposes of accounting for the debt component of the 2.875% convertible senior notes. Higher interest expense would result by recognizing the accretion of the discounted carrying value of the 2.875% convertible senior notes to their face amount as interest expense over the expected term of the 2.875% convertible senior notes using an effective interest rate method of amortization. This Proposed FSP, if issued in its current state, would be effective for fiscal years beginning after December 15, 2007, would not permit early application and would be applied retrospectively to all periods presented. We are currently evaluating the proposed new rules and its impact on our current accounting for the 2.875% convertible senior notes. However, if the Proposed FSP is adopted in its current form, we expect to recognize additional interest expense starting in 2008 due to the interest expense accretion associated with the 2.875% convertible senior notes and to report greater than previously reported interest expense due to retrospective application.

Critical Accounting Policies

The preparation of our financial statements in conformity with U.S. Generally Accepted Accounting Principles requires management to make estimates, judgments and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of expenses during the reporting period. On an ongoing basis, we evaluate our estimates that are based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. The result of these evaluations forms the basis for making judgments about the carrying values of assets and liabilities and the reported amount of expenses that are not readily apparent from other sources. Because future events and their effects cannot be determined with certainty, actual results could differ from our assumptions and estimates, and such difference could be material. Management believes that the following accounting estimates are the most critical to aid in fully understanding and evaluating our reported financial results, and they require management's most difficult, subjective or complex judgments, resulting from the need to make estimates about the effect of matters that are inherently uncertain. The following narrative describes these critical accounting estimates, the judgments and assumptions and the effect if actual results differ from these assumptions.

Allowance for Doubtful Accounts

We evaluate the collectibility of our accounts receivable based on a combination of factors. Generally, we record specific reserves to reduce the amounts recorded to what we believe will be collected when a customer's account ages beyond typical collection patterns, or we become aware of a customer's inability to meet its financial obligations. To a lesser extent, we recognize reserves based on historical experience of bad debts as a percentage of revenues for applicable businesses, adjusted for relative improvements or deteriorations in the agings.

We believe that the credit risk with respect to trade receivables is limited due to the large number and the geographic diversification of our customers.

Long-lived Assets

Long-lived assets, such as property, plant and equipment and investments in nonconsolidated affiliates, are reviewed for impairment when events and circumstances indicate that depreciable and amortizable long-lived assets might be impaired and the undiscounted cash flows estimated to be generated by those assets are less than the carrying amount of those assets. When specific assets are determined to be unrecoverable, the cost basis of the asset is reduced to reflect the current fair value.

We use various assumptions in determining the current fair market value of these assets, including future expected cash flows and discount rates, as well as future salvage values and other fair value measures. Our impairment loss calculations require us to apply judgment in estimating future cash flows, including forecasting useful lives of the assets and selecting the discount rate that reflects the risk inherent in future cash flows.

If actual results are not consistent with our assumptions and judgments used in estimating future cash flows and asset fair values, we may be exposed to future impairment losses that could be material to our results of operations.

[Index to Financial Statements](#)

Goodwill

Goodwill represents the excess of the purchase price over the fair value of identifiable net assets acquired in business combinations. We review goodwill for any potential impairment at least annually using the income approach to determine the fair value of our reporting units. The fair value of our reporting units is used to apply value to the net assets of each reporting unit. To the extent that the carrying amount of net assets would exceed the fair value, an impairment charge may be required to be recorded.

The income approach we use for valuing goodwill involves estimating future cash flows expected to be generated from the related assets, discounted to their present value using a risk-adjusted discount rate. Terminal values are also estimated and discounted to their present value.

If actual results are not consistent with our assumptions and judgments used in estimating future cash flows, we may be exposed to future impairment losses that could be material to our results of operations.

Revenue Recognition

Revenue from the presentation and production of an event is recognized after the performance occurs upon settlement of the event. Revenue related to larger global tours is recognized after the performance occurs; however, any profits related to these tours, primarily related to music tour production and tour management services, is recognized after minimum revenue thresholds, if any, have been achieved. Revenue collected in advance of the event is recorded as deferred revenue until the event occurs. Revenue collected from sponsorships and other revenue, which is not related to any single event, is classified as deferred revenue and generally amortized over the operating season or the term of the contract.

We account for taxes that are externally imposed on revenue producing transactions on a net basis, as a reduction to revenue.

Litigation Accruals

We are currently involved in certain legal proceedings and, as required, have accrued our estimate of the probable costs for the resolution of these claims. Management's estimates used have been developed in consultation with counsel and are based upon an analysis of potential results, assuming a combination of litigation and settlement strategies. It is possible, however, that future results of operations for any particular period could be materially affected by changes in our assumptions or the effectiveness of our strategies related to these proceedings.

Stock-Based Compensation

We adopted FASB Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment* (Statement 123(R)), which is a revision of FASB Statement of Financial Accounting Standards No. 123, *Accounting for Stock-Based Compensation* (Statement 123) effective January 1, 2006. Generally, the approach in Statement 123(R) is similar to the approach described in Statement 123. However, Statement 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. In accordance with Statement 123(R), we continue to use the Black-Scholes option pricing model to estimate the fair value of our stock options at the date of grant. Judgment is required in estimating the amount of stock-based awards expected to be forfeited prior to vesting. If actual forfeitures differ significantly from these estimates, non-cash compensation expense could be materially impacted.

Income Taxes

We account for income taxes using the liability method in accordance with FASB Statement of Financial Accounting Standards No. 109, *Accounting for Income Taxes*. Under this method, deferred tax assets and liabilities are determined based on differences between financial reporting bases and tax bases of assets and liabilities and are measured using the enacted tax rates expected to apply to taxable income in the periods in which the deferred tax asset or liability is expected to be realized or settled. Deferred tax assets are reduced by valuation allowances if we believe it is more likely than not that some portion or the entire asset will not be realized. As all earnings from our foreign operations are permanently reinvested and not distributed, our income tax provision does not include additional U.S. taxes on foreign operations. It is not practical to determine the amount of federal income taxes, if any, that might become due in the event that the earnings were distributed.

We adopted the provisions of FIN 48 on January 1, 2007. FIN 48 prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return. For those benefits to be recognized, a tax position must be more likely than not to be sustained upon examination by taxing authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Required information is within Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations — Market Risk.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We have established disclosure controls and procedures to ensure that material information relating to our company, including our consolidated subsidiaries, is made known to the officers who certify our financial reports and to other members of senior management and our board of directors.

Based on their evaluation as of September 30, 2007, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) are effective to ensure that (1) the information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (2) the information we are required to disclose in such reports is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures or internal controls will prevent all possible error and fraud. Our disclosure controls and procedures are, however, designed to provide reasonable assurance of achieving their objectives, and our Chief Executive Officer and Chief Financial Officer have concluded that our financial controls and procedures are effective at that reasonable assurance level.

Changes in Internal Control Over Financial Reporting

In January 2007, we implemented a new financial accounting system which was used to accumulate data used in financial reporting for 2007. The implementation was not made in response to any significant deficiency or material weakness in our internal controls. Other than ongoing modifications to our information systems, there has been no change in our internal control over financial reporting during the period covered by this report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II — OTHER INFORMATION

Item 1. Legal Proceedings

We were a defendant in a lawsuit filed by Malinda Heerwagen on June 13, 2002, in the U.S. District Court for the Southern District of New York. The plaintiff, on behalf of a putative class consisting of certain concert ticket purchasers, alleged that anti-competitive practices for concert promotion services by us nationwide caused artificially high ticket prices. On August 11, 2003, the Court ruled in our favor, denying the plaintiff's class certification motion. The plaintiff appealed this decision to the U.S. Court of Appeals for the Second Circuit. On January 10, 2006, the U.S. Court of Appeals for the Second Circuit affirmed the ruling in our favor by the District Court. On January 17, 2006, the plaintiff filed a Notice of Voluntary Dismissal of her action in the Southern District of New York.

We are a defendant in twenty-two putative class actions filed by different named plaintiffs in various U.S. District Courts throughout the country. The claims made in these actions are substantially similar to the claims made in the *Heerwagen* action described above, except that the geographic markets alleged are regional, statewide or more local in nature, and the members of the putative classes are limited to individuals who purchased tickets to concerts in the relevant geographic markets alleged. The plaintiffs seek unspecified compensatory, punitive and treble damages, declaratory and injunctive relief and costs of suit, including attorneys' fees. We have filed our answers in some of these actions, and we have denied liability. On December 5, 2005, we filed a motion before the Judicial Panel on Multidistrict Litigation to transfer these actions and any similar ones commenced in the future to a single federal district court for coordinated pre-trial proceedings. On April 17, 2006, the Panel granted our motion and ordered the consolidation and transfer of the actions to the U.S. District Court for the Central District of California. On June 4, 2007, the Court conducted a hearing on the plaintiffs' motion for class certification. On June 25, 2007, the Court entered an Order to stay all proceedings in the case pending the Court's ruling on the plaintiffs' motion for class certification. On October 22, 2007, the Court ruled in the plaintiffs' favor, granting the plaintiffs' motion for class certification and certifying a class in the Chicago, New England, New York/New Jersey, Colorado and Southern California regional markets. On November 5, 2007, we filed a Petition for Permission to Appeal from Order Granting Class Certification with the U.S. District Court of Appeals for the Ninth Circuit. At a status conference conducted on November 5, 2007, the U.S. District Court extended its stay of all proceedings pending further developments in the U.S. Court of Appeals for the Ninth Circuit. We intend to vigorously defend all claims in all of the actions.

From time to time, we are involved in other legal proceedings arising in the ordinary course of our business, including proceedings and claims based upon violations of antitrust laws and tortious interference, which could cause us to incur significant expenses. We also have been the subject of personal injury and wrongful death claims relating to accidents at our venues in connection with our operations. As required, we have accrued our estimate of the probable settlement or other losses for the resolution of any outstanding claims. These estimates have been developed in consultation with counsel and are based upon an analysis of potential results, assuming a combination of litigation and settlement strategies. It is possible, however, that future results of operations for any particular period could be materially affected by changes in our assumptions or the effectiveness of our strategies related to these proceedings. In addition, under our agreements with Clear Channel, we have assumed and will indemnify Clear Channel for liabilities related to our business for which they are a party in the defense.

Item 1A. Risk Factors

While we attempt to identify, manage and mitigate risks and uncertainties associated with our business to the extent practical under the circumstances, some level of risk and uncertainty will always be present. Item 1A of our 2006 Annual Report on Form 10-K describes some of the risks and uncertainties associated with our business which have the potential to materially affect our business, financial condition or results of operations. Other than the risk factors listed below, we do not believe that there have been any material changes to the risk factors previously disclosed in our 2006 Annual Report on Form 10-K and in our 2007 Quarterly Reports on Form 10-Q.

Risks Relating to Our Leverage

We have a large amount of debt, redeemable preferred stock and lease obligations that could restrict our operations and impair our financial condition .

As of September 30, 2007, our total indebtedness for borrowed money, including our redeemable preferred stock, was approximately \$813.4 million. Our available borrowing capacity under the revolving portion of our senior secured credit facility is approximately \$241.1 million, with sub-limits up to \$235.0 million available for letters of credit. At September 30, 2007, outstanding letters of credit were approximately \$43.9 million. We may incur substantial additional indebtedness in the future.

Index to Financial Statements

Our substantial indebtedness could have adverse consequences, including:

- making it more difficult for us to satisfy our obligations;
- increasing our vulnerability to adverse economic, regulatory and industry conditions;
- limiting our ability to obtain additional financing for future working capital, capital expenditures, mergers and other purposes;
- requiring us to dedicate a substantial portion of our cash flow from operations to payments on our debt, thereby reducing funds available for operations and other purposes;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;
- making us more vulnerable to increases in interest rates;
- placing us at a competitive disadvantage compared to our competitors that have less debt; and
- having a material adverse effect on us if we fail to comply with the covenants in the indenture relating to the notes or in the instruments governing our other debt and preferred stock.

To service our debt, preferred stock and lease obligations and to fund potential acquisitions and capital expenditures, we will require a significant amount of cash, which depends on many factors beyond our control.

As of September 30, 2007, approximately \$39.4 million of our total indebtedness (excluding interest) is due in 2007, \$22.5 million is due in the aggregate for 2008 and 2009, \$66.7 million is due in the aggregate for 2010 and 2011 and \$684.8 million is due thereafter.

Our redeemable preferred stock bears an annual dividend rate of 13%, or \$5.2 million annually, and is subject to financial and other covenants substantially similar to the covenants applicable to our senior secured credit facility. If we default under any of these covenants, we will have to pay additional dividends. In addition, as of December 31, 2006, we had approximately \$1.1 billion in operating lease agreements, of which approximately \$71.7 million is due in 2007 and \$68.9 million is due in 2008.

Our ability to service our debt, preferred stock and lease obligations and to fund potential acquisitions and capital expenditures for venue construction, expansion or renovation will require a significant amount of cash, which depends on many factors beyond our control. Our ability to make payments on and to refinance our debt will also depend on our ability to generate cash in the future. This, to an extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control.

We cannot assure you that our business will generate sufficient cash flow or that future borrowings will be available to us in an amount sufficient to enable us to pay our debt or to fund our other liquidity needs. If our future cash flow from operations and other capital resources are insufficient to pay our obligations as they mature or to fund our liquidity needs, we may be forced to reduce or delay our business activities and capital expenditures, sell assets, obtain additional equity capital or restructure or refinance all or a portion of our debt on or before maturity. We may be subject to limitations on the assets we can sell under the terms of the tax matters agreement with Clear Channel. In addition, the terms of our existing debt, including our senior secured credit facility, other future debt and our preferred stock may limit our ability to pursue any of these alternatives.

These measures might also be unsuccessful or inadequate in permitting us to meet scheduled debt, redeemable preferred stock or lease service obligations. We may be unable to restructure or refinance our obligations and obtain additional equity financing or sell assets on satisfactory terms or at all. As a result, the inability to meet our debt, redeemable preferred stock or lease obligations could cause us to default on those obligations. Any such defaults could materially harm our financial condition and liquidity.

Risks Relating to the 2.875% Convertible Senior Notes

We may not have the funds necessary to finance the repurchase of the notes or to pay the cash payable upon a conversion (if we make the net share settlement election), or we may otherwise be restricted from making such payments, which may increase your credit risk.

On July 15, 2014, July 15, 2017 and July 15, 2022, or in the event of a fundamental change (as defined in the indenture governing the notes), holders may require us to repurchase their notes at a price of 100% of the principal amount of the notes, plus accrued and unpaid interest, including contingent interest and additional amounts, to the repurchase date. In addition, at any time on or prior to June 15, 2027, we may irrevocably elect net share settlement of the notes, and thereafter we will be

Index to Financial Statements

required to make a cash payment of up to \$1,000 for each \$1,000 in principal amount of notes converted. However, it is possible that we will not have sufficient funds available at such time to make the required repurchase or settlement of converted notes. In addition, some of our existing financing agreements contain, and any future credit agreements or other agreements relating to our indebtedness could contain, provisions prohibiting the repurchase of the notes under certain circumstances, or could provide that a fundamental change constitutes an event of default under that agreement, restrict our ability to make cash payments upon conversion of the notes or restrict the ability of our subsidiaries to make funds available to us for that purpose. If any agreement governing our indebtedness prohibits or otherwise restricts us from repurchasing the notes or making the cash payment upon conversion when we become obligated to do so, we could seek the consent of the lenders to repurchase the notes or settle the conversion or attempt to refinance the other debt. If we do not obtain such a consent or refinance the debt, we would not be permitted to repurchase the notes or settle the conversion without potentially causing a default under the other debt. Our failure to repurchase tendered notes or to pay any cash payable on a conversion would constitute an event of default under the indenture, which might constitute a default under the terms of our other indebtedness.

The additional shares of common stock payable on any notes converted in connection with specified corporate transactions may not adequately compensate holders of notes for any loss they may experience as a result of such specified corporate transactions.

If certain specified corporate transactions occur on or prior to July 15, 2014, we will under certain circumstances increase the conversion rate on notes converted in connection with the specified corporate transaction by a number of additional shares of common stock. The number of additional shares of common stock will be determined based on the date on which the specified corporate transaction becomes effective and the price paid per share of our common stock in the specified corporate transaction. The additional shares of common stock issuable upon conversion of the notes in connection with a specified corporate transaction may not adequately compensate holders of notes for any loss they may experience as a result of such specified corporate transaction. Furthermore, holders of notes will not receive the additional consideration payable as a result of the increase in the conversion rate until the effective date of the specified corporate transaction or later, which could be a significant period of time after holders of notes have tendered their notes for conversion. If the specified corporate transaction occurs after July 15, 2014, or if the price paid per share of our common stock in the specified corporate transaction is less than the common stock price at the date of issuance of the notes or above a specified price, there will be no increase in the conversion rate. In addition, in certain circumstances upon a change of control arising from our acquisition by a public company, we may elect to adjust the conversion rate and, if we so elect, holders of notes will not be entitled to the increase in the conversion rate determined as described above.

We may enter into future acquisitions and take certain actions in connection with such acquisitions that could affect the price of our common stock, and, therefore, the value of the notes.

As part of our growth strategy, we expect to review acquisition prospects that would offer growth opportunities. In the event of future acquisitions, we could:

- use a significant portion of our available cash;
- issue equity securities, which would dilute current stockholders' percentage ownership;
- incur substantial debt;
- incur or assume contingent liabilities, known or unknown;
- incur amortization expenses related to intangibles; and
- incur large, immediate accounting write-offs.

Such actions by us could harm our results from operations and adversely affect the price of our common stock. Since the notes are convertible into our common stock (or, at our election, cash in an amount derived from the value of our common stock), an adverse effect on the price of our common stock could have a similar effect on the value of our notes.

The conditional conversion feature of the notes could result in holders of notes receiving less than the value of the common stock for which a note would otherwise be convertible.

Prior to July 15, 2027, the notes are convertible for shares of our common stock (or cash or a combination of cash and shares of our common stock) only if specified conditions are met. If the specific conditions for conversion are not met, holders of notes will not be able to convert their notes, and they may not be able to receive the value of the common stock or cash and common stock, as applicable, for which the notes would otherwise be convertible.

Index to Financial Statements

Upon conversion of the notes, holders of notes may receive less proceeds than expected because the value of our common stock may decline after the exercise of the conversion right.

If we elect to settle conversions other than solely in shares of common stock, including by making a net share settlement election, the conversion value that holders of notes will receive upon conversion of their notes are in part determined, subject to certain exceptions, by the average of the last reported sale prices of our common stock for the 20 trading days beginning on the second trading day immediately following the day the notes are tendered for conversion, or, if tendered within 20 days leading up to the maturity date or a specified redemption date, beginning on the fifth day following the maturity date or the redemption date. Accordingly, if the price of our common stock decreases after holder of notes tender their notes for conversion, the conversion value they will receive may be adversely affected.

The notes do not have the benefit of restrictive covenants.

The indenture governing the notes does not contain any financial or operating covenants or restrictions on the payment of dividends, the incurrence of indebtedness or the issuance or repurchase of securities by us or any of our subsidiaries. The indenture contains no covenants or other provisions to afford protection to holders of the notes in the event of a fundamental change involving us except for specified purchase rights and conversion rate adjustments. As a result, we may take actions that could adversely affect the value of the notes. In the event of a fundamental change, the terms of the notes require us to purchase the notes for cash. A takeover of us would trigger the requirement that we purchase the notes. This may have the effect of delaying or preventing a takeover of us that would otherwise be beneficial to investors.

The conversion rate of the notes may not be adjusted for all dilutive events.

The conversion rate of the notes is subject to adjustment only for certain specified events, including, but not limited to, the issuance of stock dividends on our common stock, the issuance of certain rights or warrants, subdivisions, combinations, distributions of capital stock, indebtedness or assets, cash dividends and certain issuer tender or exchange offers. However, the conversion rate will not be adjusted for other events, such as an issuance of common stock for cash or acquisition, that may adversely affect the trading price of the notes or the common stock, or for a third-party tender offer.

Some significant restructuring transactions may not constitute a fundamental change, in which case we would not be obligated to offer to repurchase the notes.

Upon the occurrence of a fundamental change, holders of notes have the right to require us to repurchase their notes. However, the fundamental change provisions will not afford protection to holders of notes in the event of certain transactions. For example, transactions such as leveraged recapitalizations, refinancings, restructurings or acquisitions initiated by us may not constitute a fundamental change requiring us to repurchase the notes. In the event of any such transaction, the holders would not have the right to require us to repurchase the notes, even though each of these transactions could increase the amount of our indebtedness or otherwise adversely affect our capital structure or any credit ratings, thereby adversely affecting the holders of notes.

We have not registered the notes or the shares of common stock issuable upon conversion, which will limit the ability to resell them.

We have agreed to use commercially reasonable efforts to cause a shelf registration statement covering resales of the notes and our common stock issuable upon conversion of the notes to become effective under the Securities Act within 210 days from the issue date. Until the notes and our common stock issued upon conversion of the notes are sold pursuant to the shelf registration statement, holders of notes may transfer or resell the notes only in a transaction exempt from the registration under the Securities Act and applicable state securities laws. Although we are obligated to attempt to register resales of the notes and our common stock issuable upon the conversion of the notes under the Securities Act, no assurances can be given as to the ability of holders to sell their notes or the common stock issuable upon conversion of the notes.

The notes may receive a lower rating than anticipated by investors, which may affect their trading price.

If one or more rating agencies rate the notes and assign to the notes a lower rating than is expected by investors, or reduce their rating in the future, the trading price of the notes would be negatively affected.

Conversion of the notes may dilute the ownership interest of existing stockholders, including holders who have previously converted their notes, and may affect our per share results and the trading price of our common stock.

The issuance of shares of our common stock upon conversion of the notes may dilute the ownership interests of existing stockholders, including holders who have previously converted their notes. Issuances of stock on conversion may

[Index to Financial Statements](#)

also affect our per share results of operations. Any sales in the public market of our common stock issuable upon such conversion could adversely affect prevailing market prices of our common stock.

Because we have the option to irrevocably elect net share settlement of the notes, we will be subject to the accounting method for convertible debt securities with net share settlement, and such accounting method may be subject to change, which may adversely affect our results of operation.

At any time on or prior to June 15, 2027, we may irrevocably elect the net share settlement of our conversion obligation with respect to the notes to be converted after the date of such election. The accounting method for net share settled securities is being reviewed. One proposed method for accounting for net share settled securities bifurcates and accounts for the debt and equity components of the security separately. The effect of this proposal is that the equity component would be accounted for as an original issue discount and would be included in the paid-in-capital section of stockholders' equity on an issuer's balance sheet. Income available to our common stockholders would be lower by recognizing accretion of the discounted carrying value of the convertible debt security to its face amount as additional interest expense.

We cannot predict the outcome of these deliberations and whether they will require that net share settled securities be accounted for under the existing method, the proposed method described above or some other method and when any change would be implemented or whether it would be implemented retroactively or prospectively.

We also cannot predict any other changes in generally accepted accounting principles that may be made affecting accounting for convertible debt securities. Any change in the accounting method for convertible debt securities could have an adverse impact on our reported or future financial results. These impacts could adversely affect the trading price of our common stock and in turn negatively impact the trading price of the notes.

Risks Relating to Our Business

Doing business in foreign countries creates risks not found in doing business in the United States.

Our international operations accounted for approximately 32% of our revenues in the first nine months of 2007 and 28% in 2006. The risks involved in foreign operations that could result in losses against which we are not insured include:

- exposure to local economic conditions;
- potential adverse changes in the diplomatic relations of foreign countries with the United States;
- hostility from local populations;
- restrictions on the withdrawal of foreign investment and earnings;
- investment restrictions or requirements on businesses owned by foreigners;
- expropriations of property;
- potential instability of foreign governments;
- risks of renegotiation or modification of existing agreements with governmental authorities;
- diminished ability to legally enforce our contractual rights in foreign countries;
- foreign exchange restrictions;
- withholding and other taxes on remittances and other payments by subsidiaries; and
- changes in foreign taxation structures.

In addition, we may incur substantial tax liabilities if we repatriate any of the cash generated by our international operations back to the United States due to our current inability to recognize any foreign tax credits that would be associated with such repatriation. We currently expect that we will repatriate some of the cash generated by our international operations at some point and to use certain of our substantial net operating losses to offset associated tax liabilities. We are not currently in a position to recognize any tax assets in the United States that are the result of payments of income or withholding taxes in foreign jurisdictions.

Risks Relating to Our Common Stock

Future sales or other issuances of our common stock could adversely affect its market price.

[Index to Financial Statements](#)

We have a large number of shares of common stock outstanding and available for resale beginning at various points in time in the future. Sales of a substantial number of shares of our common stock in the public market, or the possibility that these sales may occur, could cause the market price for our common stock to decline. As of September 30, 2007, there were 72,080,308 shares of our common stock outstanding. As of September 30, 2007, there were 34,000 shares of common stock issuable upon the exercise of options outstanding at a weighted average exercise price of \$10.60 per share.

We continually explore acquisition opportunities consistent with our strategy. These acquisitions may involve the payment of cash, the incurrence of debt or the issuance of common stock or other securities. Any such issuance could be at a valuation lower than the trading price of our common stock at the time. We cannot assure you that any potential acquisitions will be consummated.

The price of our common stock could also be affected by possible sales of our common stock by investors who view the notes as a more attractive means of equity participation in us and by hedging or arbitrage trading activity that may develop involving our common stock. The hedging or arbitrage could, in turn, affect the trading prices of the notes.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On July 18, 2007, in connection with our acquisition of the remaining 49% interest in Musictoday, we issued 453,943 shares of our common stock to one entity and five individuals who were the sellers of the remaining interest with a value of \$10.0 million. The shares have not been registered under the Securities Act of 1933, as amended (Securities Act), and were issued in reliance upon the exemptions from registration provided by Section 4(2) of the Securities Act and Rule 506 of Regulation D. The membership interest purchase agreement contained representations from the holders of the shares to support our reasonable belief that the holders acquired the shares for their own accounts and not with a view to distribution, and that the holders are “accredited investors” as defined in Regulation D.

CERTIFICATION OF CHIEF EXECUTIVE OFFICER

CERTIFICATION

I, Michael Rapino, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Live Nation, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION OF CHIEF FINANCIAL OFFICER

CERTIFICATION

I, Kathy Willard, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Live Nation, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
