- Depreciation and amortization expected to be \$75 million higher than 2023

⁽¹⁾ Events generally represent a single performance by an artist. Fans generally represent the number of people who attend an event. Festivals are counted as one event in the quarter in which the festival begins, but the number of fans is based on the days the fans were present at the festival and thus can be reported across multiple quarters. Events and fan attendance metrics are estimated each quarter.

⁽²⁾ North America refers to our events and fans within the United States and Canada.

⁽³⁾ The fee-bearing tickets estimated above include primary and secondary tickets that are sold using our Ticketmaster systems or that we issue through affiliates. This metric includes primary tickets sold during the year regardless of event timing, except for our own events where our concert promoters control ticketing which are reported when the events occur. The non-fee-bearing tickets estimated above include primary tickets sold using our Ticketmaster systems, through season seat packages and our venue clients' box offices, along with tickets sold on our "do it yourself" platform. These ticketing metrics are net of any refunds requested and any cancellations that occurred during the period and up to the time of reporting of these consolidated financial statements.

This press release contains certain non-GAAP financial measures as defined by SEC Regulation G. A reconciliation of each such measure to its most directly comparable GAAP financial measure, together with an explanation of why management believes that these non-GAAP financial measures provide useful information to investors, is provided herein.

Adjusted Operating Income (Loss), or AOI, is a non-GAAP financial measure that we define as operating income (loss) before certain acquisition expenses (including ongoing legal costs stemming from the Ticketmaster merger, changes in the fair value of accrued acquisition-related contingent consideration obligations, and acquisition-related severance and compensation), amortization of non-recoupable ticketing contract advances, depreciation and amortization (including goodwill impairment), loss (gain) on disposal of operating assets, and stock-based compensation expense. We also exclude from AOI the impact of estimated or realized liabilities for settlements or damages arising out of the Astroworld matter that exceed our estimated insurance recovery, due to the significant and non-recurring nature of the matter. Ongoing legal costs associated with defense of these claims, such as attorney fees, are not excluded from AOI. We use AOI to evaluate the performance of our operating segments. We believe that information about AOI assists investors by allowing them to evaluate changes in the operating results of our portfolio of businesses separate from non-operational factors that affect net income (loss), thus providing insights into both operations and the other factors that affect reported results. AOI is not calculated or presented in accordance with GAAP. A limitation of the use of AOI as a performance measure is that it does not reflect the periodic costs of certain amortizing assets used in generating revenue in our business. Accordingly, AOI should be considered in addition to, and not as a substitute for, operating income (loss), and other measures of financial performance reported in accordance with GAAP. Furthermore, this measure may vary among other companies; thus, AOI as presented herein may not be comparable to similarly titled measures of other companies.

AOI margin is a non-GAAP financial measure that we calculate by dividing AOI by revenue. We use AOI margin to evaluate the performance of our operating segments. We believe that information about AOI margin assists investors by allowing them to evaluate changes in the operating results of our portfolio of businesses separate from non-operational factors that affect net income (loss), thus providing insights into both operations and the other factors that affect reported results. AOI margin is not calculated or presented in accordance with GAAP. A limitation of the use of AOI margin as a performance measure is that it does not reflect the periodic costs of certain amortizing assets used in generating revenue in our business. Accordingly, AOI margin should be considered in addition to, and not as a substitute for, operating income (loss) margin, and other measures of financial performance reported in accordance with GAAP. Furthermore, this measure may vary among other companies; thus, AOI margin as presented herein may not be comparable to similarly titled measures of other companies.

Constant Currency is a non-GAAP financial measure when applied to a GAAP financial measure. We calculate currency impacts as the difference between current period activity translated using the current period's currency exchange rates. We present constant currency information to provide a framework for assessing how our underlying businesses performed excluding the effect of foreign currency rate fluctuations.

Free Cash Flow — Adjusted, or FCF, is a non-GAAP financial measure that we define as net cash provided by (used in) operating activities less changes in operating assets and liabilities, less maintenance capital expenditures, less distributions to noncontrolling interest partners. We use FCF among other measures, to evaluate the ability of operations to generate cash that is available for purposes other than maintenance capital expenditures. We believe that information about FCF provides investors with an important perspective on the cash available to service debt, make acquisitions, and for revenue generating capital expenditures. FCF is not calculated or presented in accordance with GAAP. A limitation of the use of FCF as a performance measure is that it does not necessarily represent funds available for operations and is not necessarily a measure of our ability to fund our cash needs. Accordingly, FCF should be considered in addition to, and not as a substitute for, net cash provided by (used in) operating activities and other measures of financial performance reported in accordance with GAAP. Furthermore, this measure may vary among other companies; thus, FCF as presented herein may not be comparable to similarly titled measures of other companies.

Free Cash is a non-GAAP financial measure that we define as cash and cash equivalents less ticketing-related client funds, less event-related deferred revenue, less accrued expenses due to artists and cash collected on behalf of others, plus event-related prepaids. We use free cash as a proxy for how much cash we have available to, among other things, optionally repay debt balances, make acquisitions and fund revenue generating capital expenditures. Free cash is not calculated or presented in accordance with GAAP. A limitation of the use of free cash as a performance measure is that it does not necessarily represent funds available from operations and it is not necessarily a measure of our ability to fund our cash needs. Accordingly, free cash should be considered in addition to, and not as a substitute for, cash and cash equivalents and other measures of financial performance reported in accordance with GAAP. Furthermore, this measure may vary among other companies: thus, free cash as presented herein may not be comparable to similarly titled measures of other companies.
